1.0 Statement of Compliance

Aus-10 Rhyolite Pty Ltd t/a Hy-Tec Concrete and Aggregates (Hy-Tec) operates Tinda Creek Sand Quarry. The sand quarry is located approximately 67 km north of Windsor along Putty Road, NSW (refer to **Figure 2.1**). Quarrying activities have been undertaken at Tinda Creek Sand Quarry for approximately 30 years with the quarry currently producing up to 125,000 tonnes of product per year. The existing operations have been developed in accordance with a number of development consents, licences and project approvals, including DA 134/95 (surrendered on 10 December 2015), Development Consent (SSD_4978) and Environment Protection Licence (EPL) 12007.

During the 2015 annual review period, there were no non-compliances with Development Consent and licence conditions detailed in **Section 3.0** below. No independent environmental audits were undertaken during the report period up to December 2015. In the instance that non-compliance is recorded, all non-compliances are assessed using the key for the compliance status in **Table 1.1** below.

Table 1.1 Compliance Status Key (NSW Government, 2015)

| Risk Level | Colour Code | Description |
|-------------------------------|---------------|---|
| High | Non-compliant | Non-compliance with potential for significant environmental consequences, regardless of the likelihood of occurrence |
| Medium | Non-compliant | Non-compliance with: <ul style="list-style-type: none"> potential for serious environmental consequences, but is unlikely to occur potential for moderate environmental consequences, but is likely to occur. |
| Low | Non-compliant | Non-compliance with: <ul style="list-style-type: none"> potential for moderate environmental consequences, but is unlikely to occur potential for low environmental consequences, but is likely to occur. |
| Administrative non-compliance | Non-compliant | Only to be applied where the non-compliance does not result in any risk of environmental harm (e.g. submitting a report to government later than required under approval conditions) |

2.0 Introduction

Aus-10 Rhyolite Pty Ltd t/a Hy-Tec Concrete and Aggregates (Hy-Tec) operates Tinda Creek Sand Quarry. The sand quarry is located approximately 67 km north of Windsor along Putty Road, NSW (refer to **Figure 2.1**). Quarrying activities have been undertaken at Tinda Creek Sand Quarry for approximately 30 years with the quarry currently producing up to 125,000 tonnes of product per year. The existing operations have been developed in accordance with a number of development consents, licences and project approvals, including DA 134/95 (incorporating the 2009 modifications) and Environment Protection Licence (EPL) 12007.

On 10 April 2015, Hy-Tec was granted development to increase production levels from Tinda Creek Sand Quarry from approximately 125,000 tonnes per annum (tpa) up to 300,000 tpa and to increase the area subject to sand extraction to include additional identified resource domains (the Project). The duration of the Project is expected to be approximately 30 years.

The development consent allows for extraction operations outside of the area of the Tinda Creek Sand Quarry approved under DA 134/95 (refer to **Figure 2.2**).

Extraction operations outside of the area approved under DA 135/94 commenced in late September 2015. Up until this time all activities on the site were undertaken in accordance with the requirements of DA 134/95 which was surrendered on 10 December 2015 in accordance with SSD_4978 consent conditions.

This annual report has been prepared by Umwelt (Australia) Pty Limited (Umwelt) on behalf of Hy-Tec Concrete & Aggregates in compliance with Condition 4 of Schedule 5 of the Development Consent (SSD_4978) and the Environmental Management Plan (EMP) for Tinda Creek Sand Quarry for the year 2015.

2.1 Quarry Contacts

The Tinda Creek Quarry Manager is responsible to the regulatory authorities for all aspects of environmental compliance at the site including day-to-day site environmental management and reporting such as monitoring and supervision of environmental works. The details of the Quarry Manager are listed in **Table 2.1**.

Proposed Expansion of
Tinda Creek Sand Quarry Project

3.0 Approvals

The operations at Tinda Creek Sand Quarry were subject to a range of statutory approvals during the annual review period. These are summarised below and discussed in further detail in the following sections:

- Development Application 134/95 (surrendered on 10 December 2015)
- Development Consent SSD_4978 (commenced September 2015)
- EPL 12007.

In accordance with the Development Consent (SSD_4978), Tinda Creek is required to implement a range of environmental management plans as part of the Tinda Creek Environmental Management Strategy (EMS). Following commencement of SSD_4978 in September 2015, it is envisaged that the following documentation will be applied across the operation during the 2016 reporting period as required under the Development Consent to meet legislative requirements:

- Noise Management Plan (NMP)
- Air Quality Management Plan (AQMP)
- Water Management Plan (SWMP)
- Landscape Management Plan (LMP)
- Cultural Heritage Management Plan (CHMP).

3.1 Status of Development Consents

3.1.1 Development Consent SSD_4978

On 10 April 2015 Hy-Tec was granted development consent SSD_4978. On 10 December 2015, Tinda Creek Sand Quarry formerly surrendered DA 134/95. Since that time Hy-Tec has operated the quarry in accordance with SSD_4978. A copy of SSD 4978 is provided at **Appendix 1**.

Condition 4 of Schedule 5 of SSD_4978 requires an annual review to be prepared as set out in **Table 3.1** below:

Table 3.1 Project Approval Conditions for the Annual Review

| Project Approval Condition | Section of Document |
|--|---|
| 4. By the end of December each year, or other timing agreed by the Director-General, the Proponent shall review the environmental performance of the development to the satisfaction of the Secretary. This review must: | Whole Document |
| a) describe the development (including any rehabilitation) that was carried out in the past calendar year, and the development that is proposed to be carried out over the next year | Section 4.0 and Section 8.0 |

| Project Approval Condition | Section of Document |
|--|-------------------------------------|
| b) include a comprehensive review of the monitoring results and complaints records of the development over the previous calendar year, which includes a comparison of these results against the: <ul style="list-style-type: none"> • relevant statutory requirements, limits or performance measures/criteria • monitoring results of previous years • relevant predictions in the EIS | Section 6.0 |
| c) identify any non-compliance over the last year, and describe what actions were (or are being) taken to ensure compliance | Section 11.0 |
| d) identify any trends in the monitoring data over the life of the development | Section 6.0 |
| e) identify any discrepancies between the predicted and the actual impacts of the development, and analyse the potential cause of any significant discrepancies | Section 6.0 and Section 12.0 |
| f) describe what measures will be implemented over the current calendar year to improve the environmental performance of the Development. | Section 6.0 |

Between September 2015 and 10 December 2015, the quarry operated under DA 134/95 for sand processing and transport operations and SSD_4978 for sand extraction operations within areas approved under SSD_4978.

This report provides a review of operations in accordance with Condition 4 of Schedule 5 of SSD 4978 for the period up to December 2015.

3.1.2 Consent Surrender

As part of Development Consent conditions Hy-Tec was required to surrender development consent DA 134/95 which was surrendered on 10 December 2015. Since that time Hy-Tec has operated the quarry in accordance with SSD_4978.

3.2 Status of Licences and Permits

3.2.1 EPL 12009

Hy-Tec holds EPL 12007 and operates Tinda Creek Sand Quarry in accordance with the requirements of EPL 12007 as at May 2015. A copy of EPL 12007 is provided at **Appendix 2**.

Condition M2 requires Hy-Tec to keep records of all complaints.

Condition M3 requires Hy-Tec to maintain a telephone complaints line.

EPL 12007 was varied on 18 December 2015 to include monthly inspections of the surface water management system, annual noise monitoring and associated reporting.

3.2.2 Water Licences

Hy-Tec holds groundwater bore licences for the site with a total approved extraction capacity of 55 million litres (ML) per year, comprising Licence 10WA112523 (WAL24381) (40 ML) and Licence 10WA112531 (WAL 24367) (15 ML).

4.0 Operations Summary

A summary of the operations undertaken at Tinda Creek Sand Quarry during the reporting period are included in the following sections.

4.1 Quarry Operations

During the reporting period, sand extraction was undertaken within the existing area approved under DA 134/95 up until September 2015 after which time extraction was undertaken in Domain 6 which was approved under SSD_4978. During 2015, a total of 118,856 tonnes of sand product was transported from the quarry which is below the 125,000 tpa approved under development consent DA 134/95 and the 300,000 tpa approved under SSD_4978. An overview of the operations within the extraction areas is detailed within **Table 4.1** with monthly production detailed in **Table 4.2**.

Sand extraction within Domain 6 commenced following approval of the Development Consent (SSD_4978) in September 2015. Sand is extracted from the quarry pit using a cutter-suction dredge that floats on a dredge pond within the quarry pit. Water, sand, silt and clay are pumped from the dredge pond to the processing area as a slurry. Sand product is then loaded to trucks for transport across NSW.

Table 4.1 Production Summary 2015

| Material | Approved Limit (Source – DA 134/95 & SSD_4978) | 2015 Reporting Period (Actual Tonnes) | 2016 Reporting Period (Forecast Tonnes) |
|---|---|--|--|
| Total Saleable Product from Tinda Creek Sand Quarry | 125,000 tpa 300,000 tpa | 118,856 tonnes | 200,000 |

Table 4.2 Monthly Tonnes – Sales Summary 2015

| Date | Monthly Tonnes – Sales | Monthly Production |

| Jun-15 | 11,301 | 11,816 |
| Jul-15 | 12,202 | 12,082 |
| Aug-15 | 10,440 | 11,200 |

| Date | Monthly Tonnes – Sales | Monthly Production |
|-------------------|------------------------|--------------------|
| Sep-15 | 10,320 | 9,084 |
| Oct-15 | 10,695 | 10,436 |
| Nov-15 | 9,841 | 7,886 |
| Dec-15 | 8,993 | 1,800 |
| Total 2015 | 118,856 | 119,356 |

4.1.1 Hours of Operations

Sand extraction and haulage activities at Tinda Creek Sand Quarry may only occur within the hours specified by Schedule 3, Condition 3 of the Development Consent (SSD_4978), refer to **Table 4.3**. Tinda Creek Sand Quarry continued to operate within the operating hours specified by Schedule 3, Condition 3 of the Development Consent (SSD_4978), throughout the report period.

Table 4.3 Tinda Creek Sand Quarry Approved Operating Hours (Development Consent SSD_4978)

| Activity | Operating Hours |
|--------------------------------------|--|
| Extraction operations and deliveries | 7 am to 6 pm, Monday to Friday |
| | 7 am to 3 pm, Saturday |
| | No activities on Sundays of Public Holidays |
| Dispatch | 5 am to 10 pm, Monday to Friday |
| | 6 am to 3 pm, Saturday |
| Construction Activities | 7 am to 6 pm, Monday to Friday |
| | 8 am to 1 pm, Saturday |
| | No construction to be undertaken on Sundays of Public Holidays |
| Maintenance Activities | 24 hours a day, 7 days per week, providing maintenance activities are inaudible at any privately-owned residence |

4.1.2 Vehicle Movements

Haulage activities at Tinda Creek Sand Quarry are specified under Condition 6(b) of Schedule 3 of the Development Consent (SSD_4978), which specifies:

- 6(b) the Applicant shall not dispatch more than 34 trucks per day or receive more than 34 trucks per day, averaged over a calendar month.*

Total and average vehicle movements during the report period at Tinda Creek Sand Quarry are summarised in **Table 4.4**. There were no non-compliances with Condition 6(b) of Schedule 3 during the report period.

All heavy vehicles seen during the site inspections arriving and leaving the site had their loads suitably covered in accordance with quarry requirements. Daily vehicle movements were not exceeded during the report period.

Table 4.4 Monthly Sand Production and Transport at Tinda Creek Sand Quarry

| Date | Monthly Laden Truck Movements | Average Daily Laden Movements |
|-------------------|-------------------------------|-------------------------------|
| Jan-15 | 199 | 6.4 |
| Feb-15 | 314 | 11.2 |
| Mar-15 | 361 | 11.6 |
| Apr-15 | 230 | 7.7 |

| Oct-15 | 338 | 10.9 |
| Nov-15 | 310 | 10.3 |
| Dec-15 | 280 | 9.0 |
| Total 2015 | 3718 | |

4.2 Construction Activities

No construction activities or establishment of any advertising structures were undertaken during the report period up to December 2015. Should any new facilities be constructed, certification of these facilities will be undertaken as required and any future development applications will be submitted to the appropriate authority for assessment as required.

4.3 2016 Report Period Extraction Operations

The 2016 report period will see continuation of sand extraction in Domain 6 with additional extraction activities proposed for Domains 1, 2, 3, 6 and 7 in accordance with statutory approvals. It is anticipated that, during 2016, there will be no upgrades made to current plant and equipment utilised onsite.

Tinda Creek Sand Quarry will continue with current rehabilitation procedures during the 2016 report period. In addition, Tinda Creek Sand Quarry will continue discussions with the Office of Environment and Heritage (OEH) regarding the biodiversity offset strategy for the proposed biodiversity offset area surrounding the operation.

5.0 Actions from 2014 Annual Review

The Department of Environment and Planning (DP&E) did not provide any feedback in regards to the Tinda Creek Sand Quarry 2014 Annual Review which was submitted to DP&E in accordance with Condition 4 of Schedule 5 of the Development Consent.

6.0 Environmental Performance

In accordance with the Development Consent (SD_4978) Tinda Creek Sand Quarry will prepare a number of management plans in consultation with relevant stakeholders. The management plans will be prepared for a number of environmental management aspects. The management plans prepared for Tinda Creek Sand Quarry are detailed below:

- Noise Management Plan (Umwelt 2016a)
- Air Quality Management Plan (Umwelt 2016b)
- Water Management Plan (Umwelt 2016c)
- Landscape Management Plan (Umwelt 2016d)
- Heritage Management Plan (Umwelt 2016e)
- Transport Management Plan (Umwelt 2016f).

The following sections provide a summary of environmental monitoring and management undertaken during the 2015 report period.

A summary of the environmental performance of Tinda Creek Sand Quarry is included in **Table 6.1** below with further contextual information included within the following **Sections 6.1 to 6.7**.

Table 6.1 Summary of Environmental Performance during 2015

| Aspect | Approval Criteria/EIS Prediction | Performance during the reporting period | Trend/key management implications | Implemented/proposed management actions |
|---|---|---|---|---|
| Noise (refer to Section 6.1) | Condition 4 – 6 of Schedule 3 of Development Consent SSD_4978 and L3 of EPL 12007 Tinda Creek Sand Quarry will ensure that the noise generated by the project does not exceed the prescribed criteria. | A noise monitoring program has been developed as part of the Noise Management Plan required by Development Consent (SSD_4978). No complaints in relation to Noise were received during the report period. | No complaints in relation to Noise were received during the report period. | The annual attended noise monitoring program will be implemented in accordance with the Development Consent (SSD_4978) and EPL 12007. |
| Air Quality (refer to Section 6.2) | Condition 7 – 9 of Schedule 3 of Development Consent SSD_4978 and O3 of EPL 12007. | An air quality monitoring program will be developed as part of the Air Quality Management Plan required within 6 months of commencement of the Development Consent (SSD_4978). | No complaints have been received in relation to air quality during the report period. | Monitoring will continue at Tinda Creek Sand Quarry on a monthly basis in accordance with the Development Consent (SSD_4978). |
| Meteorological (refer to Section 6.3) | Condition 10 of Schedule 3 of the Development Consent (SSD_4978). | Compliant. | Meteorological data obtained as required during the report period. | Tinda Creek Sand Quarry will continue to utilise the meteorological station on site. |
| Soil and Water Management (refer to Section 7.0) | Condition 11 – 10 of the Development Consent (SSD_4978) and M2 and R4.2 of EPL 12007. | Compliant. | All water is captured and managed via the existing closed water management system. | Continued implementation of existing controls. |

| Aspect | Approval Criteria/EIS Prediction | Performance during the reporting period | Trend/key management implications | Implemented/proposed management actions |
|---|---|---|---|---|

| Aspect | Approval Criteria/EIS Prediction | Performance during the reporting period | Trend/key management implications | Implemented/proposed management actions |
|---|--|---|---|---|
| Traffic and Transport (refer to Section 10) | Condition 23 of Schedule 3 of the Development Consent (SSD_4978). Tinda Creek Sand Quarry shall ensure that all vehicles have appropriate signage, have their loads covered, are clean of sand and other material when exiting the site and ensure that no vehicles queue at the quarry entrance before 6am | Compliant. No exceedances of vehicle movements were recorded during the report period up to December 2015. | All vehicle movements are undertaken in line with the limits on consent. | Ongoing monitoring and recording of average daily truck movements will continue to be implemented at Tinda Creek Sand Quarry. |
| Rehabilitation (refer to Section 8) | Condition 17 of Schedule 3 of the Development Consent (SSD_4978). The final landform must be generally consistent with the proposed rehabilitation strategy in the EIS and comply with the prescribed rehabilitation objectives. | N/A | No rehabilitation works were undertaken during the report period up to December 2015. | Rehabilitation works are proposed for the 2016 report period. |

6.1 Operational Noise

There was no noise monitoring undertaken during the report period up to December 2015. Noise monitoring is proposed for the 2016 report period in accordance with Condition 6 of Schedule 3 of the Development Consent (SSD_4978).

6.1.1 Noise Criteria

Noise criteria are set for day shoulder, day and evening periods to protect the amenity of neighbouring residents. Noise criteria are expressed as a LAeq (15 min) limit and are specified in the development consent for the Tinda Creek Sand Quarry. Project specific noise criteria for the Tinda Creek Sand Quarry are outlined in Table 2 of the development consent and are reproduced as **Tables 6.2** and **6.3**. Hy-Tec shall ensure that the noise generated by the development does not exceed the criteria at any residence on privately-owned land.

Table 6.2 Industrial Noise Impact Assessment Criteria, dB(A)

| Location | Day/Evening ¹ LAeq, 15 min | Evening ¹ LAeq, 15 min | Night ¹ LAeq, 15 min | Night ¹ LA1, (max) |
|---------------|--|--------------------------------------|------------------------------------|----------------------------------|
| All receivers | 35 | 35 | 35 | 45 |

Note 1: Day time is 7.00 am to 6.00 pm Monday to Saturday and 8.00 am to 6.00 pm Sundays and Public Holidays, evening is 6.00 pm to 10.00 pm (NSW Industrial Noise Policy (INP) EPA, 2000).

Table 6.3 Traffic Noise Impact Assessment Criteria, dB(A)

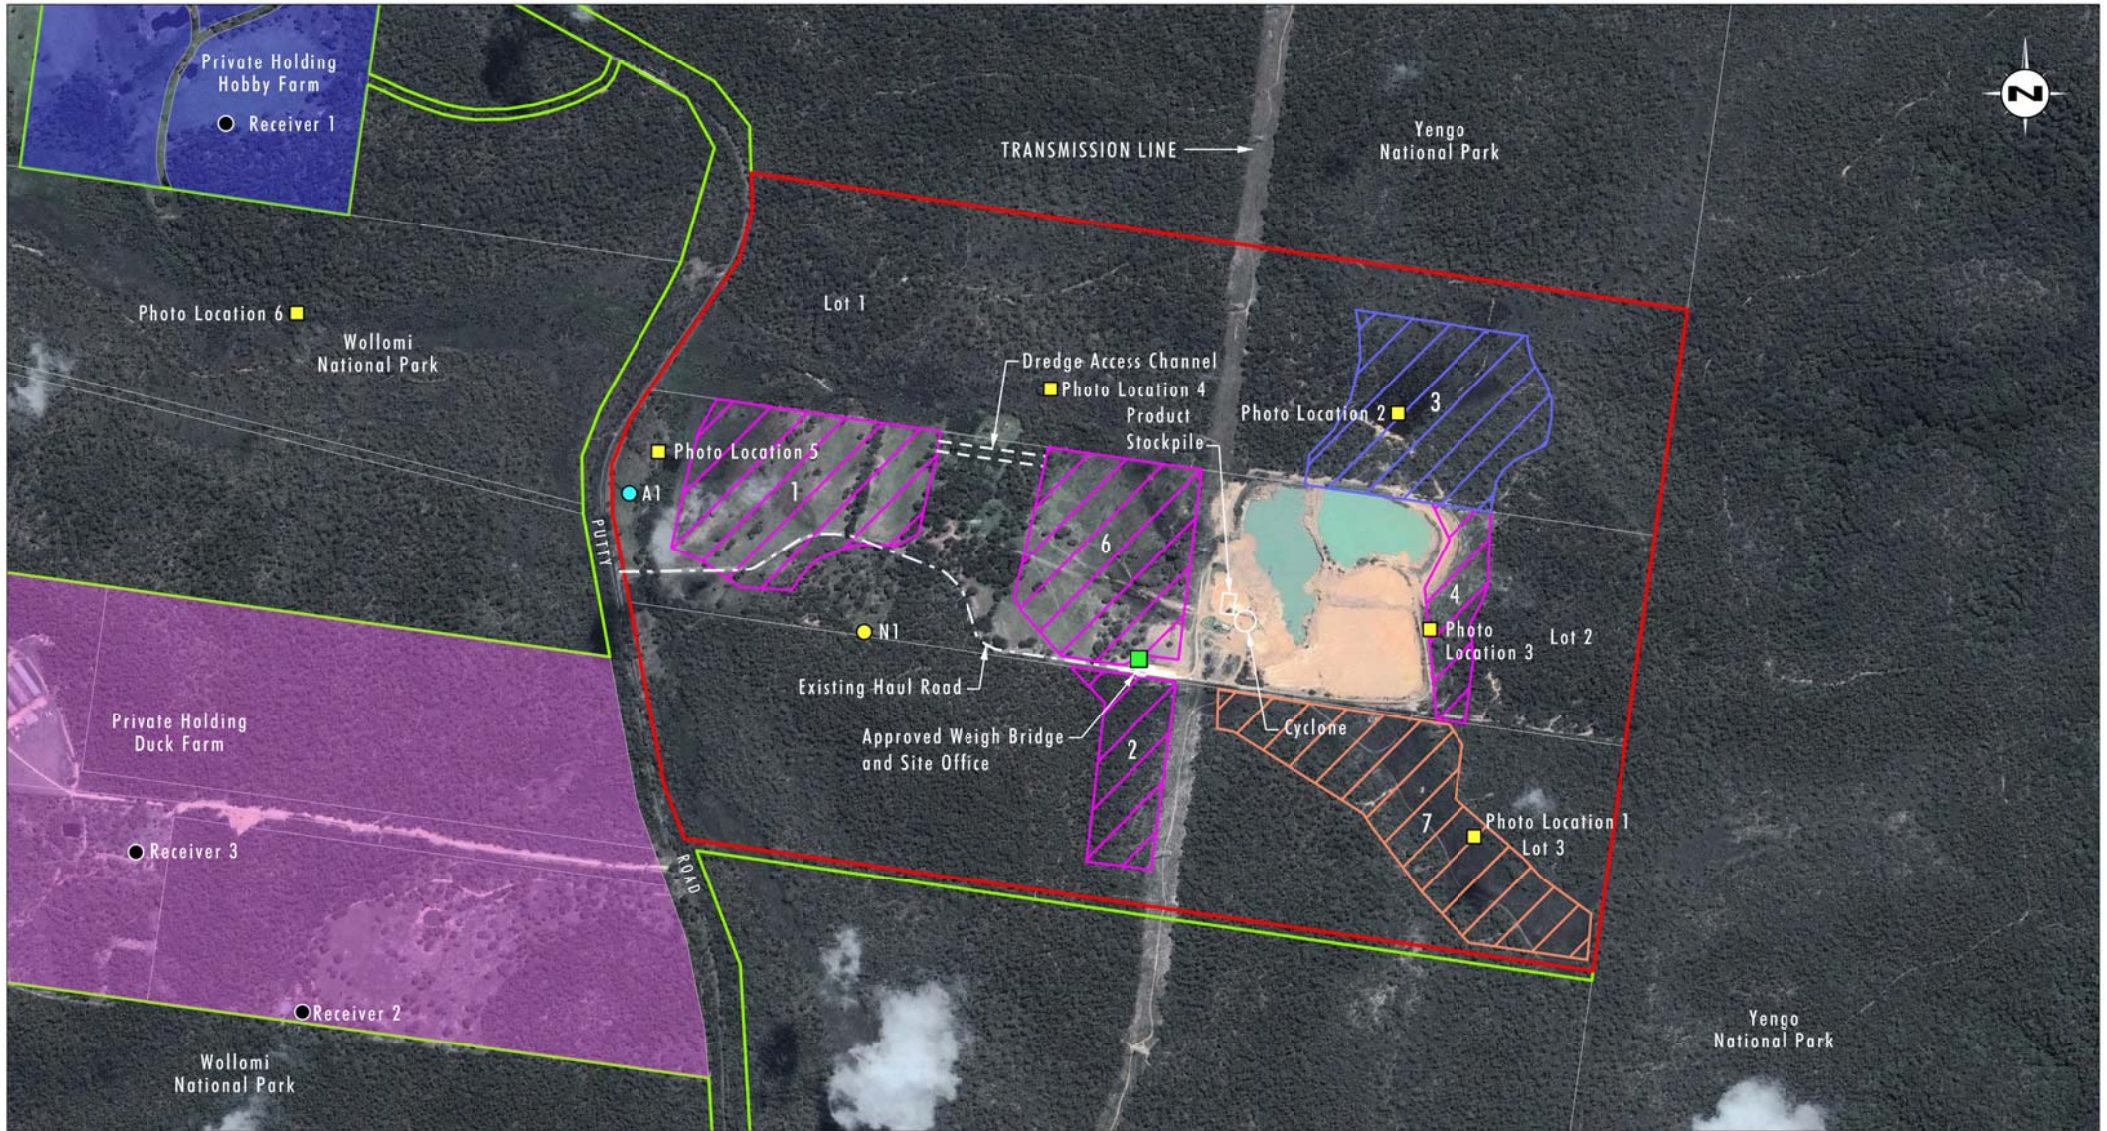

| Road | Day ¹ LAeq, 1 hour | Night ¹ LAeq, 1 hour |
|-------------------------------------|----------------------------------|------------------------------------|
| Freeway/arterial/sub-arterial roads | 60 | 55 |

6.1.2 Noise Monitoring Locations

Attended noise monitoring will be undertaken at the location specified in **Table 6.4**. The location of the attended noise monitoring location is shown on **Figure 6.1**.

FIGURE 6.1

Tinda Creek Sand Quarry Monitoring Locations

6.2 Air Quality

There was no air quality monitoring undertaken during the report period up to December 2015. Air quality monitoring is proposed for the 2016 report period in the locations shown on **Figure 6.1** in accordance with Condition 9 of Schedule 3 of the Development Consent (SSD_4978).

6.2.1 Air Quality Criteria

Goals for dust concentration are referred to as long term (annual average) and short term (24 hour maximum) goals. The goals relate to the total ambient dust concentrations and dust deposition levels, i.e. quarry contribution in addition to the background contribution. Condition 7 of Schedule 3 of the Development Consent (SSD_4978) sets out air quality impact criteria for Tinda Creek Sand Quarry. These criteria are used to assess the potential impacts of operations at nearby residential receivers. Criteria which apply to operations are specified in **Tables 6.5, 6.6 and 6.7** below.

Table 6.5 Long-term criteria for particulate matter

| Pollutant | Averaging period | ^d Criterion |
|---|------------------|-----------------------------------|
| Total suspended particulates (TSP) | Annual | ^a 90 µg/m ³ |
| Particulate matter <10 µm (PM ₁₀) | Annual | ^a 30 µg/m ³ |

Table 6.6 Short-term criteria for particulate matter

| Pollutant | Averaging period | ^d Criterion |
|---|------------------|-----------------------------------|
| Particulate matter <10 µm (PM ₁₀) | 24 hour | ^a 50 µg/m ³ |

Table 6.7 Long-term criteria for deposited dust

| Pollutant | Averaging period | Maximum increase in deposited dust level | Maximum total dust level |
|-----------------------------|------------------|--|--|
| ^c Deposited dust | Annual | ^b 2 g/m ² /month | ^b 4 g/m ² /month |

Notes to **Tables 6.5, 6.6 and 6.7**:

- a Total impact (i.e. incremental increase in concentrations due to the development plus background concentrations due to all other sources)
- b Incremental impact (i.e. incremental increases in concentrations due to the development on its own)
- c Deposited dust is to be assessed as insoluble solids as defined by AS/NZS 3580.10.1:2003: Methods for Sampling and Analysis of Ambient Air – Determination of Particulate Matter – Deposited Matter – Gravimetric Method
- d Excluded extraordinary events such as bush fires, prescribed burning, dust storms, sea fog, fire incidents, illegal activities or any other activity agreed by the Director-General in consultation with the EPA.

6.2.2 Air Quality Management Measures

Hy-Tec is committed to implementing all reasonable and feasible air quality mitigation measures, to reduce the potential impact of the operation on sensitive receivers. In order to mitigate any potential air quality impacts from the operation, a number of air quality management controls will be implemented throughout the life of the operation.

The dust control measures available for quarry operations are generally a combination of engineering controls, operational controls, and planning controls with existing dust control measures in place continuing to be implemented as part of the quarry expansion. As the majority of the quarry extraction processes are 'wet', the operation has inherent dust control. Additional dust control measures include:

- checking to ensure that appropriate stockpile moisture content is maintained
- use of a water cart on other trafficked areas as required
- minimising the areas and duration of exposed soils
- prompt commencement of stabilisation/rehabilitation in accordance with the existing Environmental Management Plan (Umwelt, 2015)
- sealing of the haul road from weighbridge to Putty Road.

6.3 Meteorological Monitoring

A meteorological station is to be installed at the Tinda Creek Sand Quarry as detailed on **Figure 6.1**. The meteorological monitoring data obtained from the station will be in accordance with the requirements of Condition 10 of Schedule 3 of the development consent.

6.3.1 Rainfall

Rainfall has been recorded daily at Tinda Creek Sand Quarry since 2007. A copy of the aggregated monthly rainfall records for the period 2007 to 2015 is provided in **Table 6.8**.

Table 6.8 Tinda Creek Sand Quarry Monthly Rainfall

| Month | Monthly Rainfall (mm) | | | | | | | | |
|----------|-----------------------|-------|-------|-------|------|------|------|-------|-------|
| | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 |
| January | 50.5 | 95.5 | 29 | 48.5 | 66.5 | 133 | 138 | 8 | 163 |
| February | 152 | 146.5 | 137.5 | 119.5 | 47 | 179 | 202 | 64 | 46.5 |
| March | 80.5 | 43 | 30 | 85.5 | 97 | 145 | 103 | 135.2 | 96.5 |
| April | 61.5 | 81.5 | 117 | 26 | 60 | 64 | 63.5 | 60.5 | 285.5 |
| May | 29 | 10.5 | 56.5 | 59.5 | 96 | ? | 31 | 0 | 56.5 |
| June | 210 | 94 | 39.5 | 43 | 85.5 | 29 | 84.5 | 29 | 20.5 |
| July | 13 | 24.5 | 17.5 | 38.5 | 25.5 | 27 | 18.5 | 13 | 34 |

| Month | Monthly Rainfall (mm) | | | | | | | | |
|--------------------|-----------------------|------------|--------------|------------|--------------|------------|------------|--------------|---------------|
| | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 |
| August | 107 | 40.5 | 4 | 13.5 | 90 | 4 | 11 | 74.5 | 26.5 |
| September | 18.5 | 58.5 | 21 | 18 | 69 | 27.5 | 31.5 | 29 | 26.5 |
| October | 22 | 93.5 | 85.5 | 85 | 65.5 | 17.5 | 26.5 | 48 | 34 |
| November | 157.5 | 75 | 31.5 | 127.5 | 159 | 70.5 | 106.5 | 16.5 | 141 |
| December | 76 | 71 | 103.5 | 120.5 | 72.5 | 18.5 | 27 | 150 | 116 |
| Totals (mm) | 977.5 | 834 | 672.5 | 785 | 933.5 | 715 | 843 | 627.7 | 1046.5 |

As can be seen from **Table 6.8**, 2015 was a high rainfall year with 1046.5 mm of rain recorded compared to the annual average of 772 mm for the period 1964 to 2014 recorded at Putty. Highest annual rainfall recorded over this period at Putty was 1178 mm. The most significant falls occurred in April when 285.5 mm was recorded for the month.

No breaches of the closed water management system were recorded during 2015.

6.4 Ecology

An aquatic sampling and condition assessment was undertaken at eight locations during the report period to assess the condition of drainage and creek lines at Tinda Creek Quarry. Results from the assessment are discussed in **Section 6.4.1**. Short, medium and long term ecological monitoring is required to be undertaken as part of the Landscape Management Plan for the site in accordance with Condition 19(h) of Schedule 3 of the Development Consent (SSD_4978) and is proposed to be undertaken during 2016.

Monitoring reports will present the results of survey and analysis and provide an interpretation of the results as required under the Development Consent (SSD_4978). Discussion will be provided about the results of macro invertebrate survey and water quality measurements; and compare findings between sites, sampling seasons and years. Ongoing monthly observations of rehabilitation areas will be undertaken and any maintenance actions completed on an as needed basis at the discretion of the Quarry Manager.

Ecological monitoring required under the Development Consent (SSD_4978) is summarised in **Table 6.9** below. The details of ecological monitoring undertaken during the report period are discussed in **Section 6.4.1**. All other ecological monitoring requirements will be undertaken as required from commencement of the Development Consent (SSD_4978).

Table 6.9 Ecological Monitoring Regime

| Monitoring Type | Location | Parameters Monitored | Frequency of Monitoring | Monitoring Method | Responsibility |
|--------------------------|---|--|----------------------------------|---------------------------------|----------------|
| Rehabilitation | Rehabilitation Areas | General status of creek lines and rehab areas | monthly | Observation | Quarry Manager |
| Long term Rehabilitation | Rehabilitation Areas and Analogue sites | Soil conditions and erosion, drainage and sediment control structures, runoff water quality, germination rates, plant health, natural regeneration, weed infestation | Six monthly | Field survey | Quarry Manager |
| Habitat Assessment | Biodiversity Offset Areas | Erosion, vegetation health, floristic structure, presence of weeds, signs of disturbance, fire impact, ground cover, fauna usage, water resources | Annually unless otherwise agreed | Field Survey | Quarry Manager |
| Koala | Biodiversity Offset Areas | Targeted Spot Assessment Technique, Call playback surveys, Spotlight surveys. | Annually unless otherwise agreed | Field Survey | Quarry Manager |
| Grevillea Parviflora | Biodiversity Offset Areas | surveys during known flowering period (July to December), stem counts in permanent plots, photo monitoring, habitat quality, | Annually for first 5 years | Field Survey | Quarry Manager |
| Nest Box | Biodiversity Offset Areas | Condition assessment | Annually for first 5 years | Field Inspection and LED camera | Quarry Manager |

| Monitoring Type | Location | Parameters Monitored | Frequency of Monitoring | Monitoring Method | Responsibility |
|-------------------------------------|--|--|----------------------------|--|----------------|
| Threatened Fauna Species Monitoring | | Koala, eastern pygmy possum, squirrel glider, forest owls, threatened micro-bat species, introduced species | After 5 years of operation | Diurnal bird area searches, diurnal reptile/ amphibian area searches, nocturnal spotlight surveys, nocturnal call playback surveys remote camera surveys, nocturnal Anabat surveys | Quarry Manager |
| Aquatic monitoring | Drainage Lines upstream and downstream of site | Macroinvertebrates, stream width and description of edge habitat, description of stream features including substrate, vegetation, and organic material, site observations including catchment description and local land use practises/impacts, riparian characteristics | Annually | Field survey and photo monitoring | Quarry Manager |

6.4.1 Drainage Lines

Drainage lines to the south-east and north of the existing quarry have been diverted around the quarry to ensure that flows from undisturbed areas drain to downstream sections of Tinda Creek and Blue Mountains World Heritage Area with negligible impact on surface flow volumes in the creek system. All drainage channels are constructed to avoid turbulence and scouring. Flow dissipation and channel stabilising structures such as rock weirs and rock armouring have been installed at several locations around the diversion drain system to minimise turbulence and scouring.

On 17 November 2015 an assessment of Tinda Creek Sand Quarry drainage line was undertaken and photographs recorded at each of the nominated photo-monitoring location as shown on **Figure 6.1** (Photo Locations). The condition of the creek system is shown in **Plates 6.1 to 6.16**.

Full details of the survey are provided in '2015 Aquatic Sampling and Condition Assessment, Tinda Creek Sand Quarry (Umwelt, December 2015)' which concluded:

The general health of the vegetation and waterways at each of the eight monitoring sites was found to be in good condition (except in the case of Site 3, where there is currently no vegetation present). There is no obvious difference in the condition of the riparian vegetation or aquatic environment at any of the test sites compared with the control sites. Based on the results of the baseline monitoring surveys, there is currently no evidence that would suggest that the quarry has resulted in any adverse impacts on the ecological nature of Tinda Creek Sand Quarry and downstream aquatic environments of the Greater Blue Mountains World Heritage Area.

6.5 Aboriginal Heritage

6.5.1 Aboriginal Site Impacts

One Aboriginal archaeological site, AHIMS #45-2-2545 Tinda Creek Artefact Scatter 1, has been recorded within Domain 3 of the Tinda Creek project area (Umwelt, 2014).

No actions or impacts in relation to this known site occurred during the report period.

6.6 Non-Aboriginal Heritage

No actions or impacts in relation to non-Aboriginal heritage occurred during the report period.

6.7 Erosion and Sediment Control

Detailed sediment and erosion control plans will be developed and implemented prior to commencement of operations within each domain and then reviewed and updated as required over the life of the quarry for all disturbance and rehabilitation areas.

During regular site inspections undertaken during the report period, erosion and sedimentation control devices were observed around and within quarry site. Details of the erosion and sediment controls emplaced at Tinda Creek Sand Quarry were submitted to Council as Section 3.6 of the EMP (Umwelt, 2015).

All stockpiles are located within the perimeter of the quarry water management system and are clear of any active watercourses. Erosion controls to reduce sediment runoff have been installed as required.

All erosion controls are constructed as per Blue Book (Managing Urban Stormwater: Soils and Construction, Landcom, 2004) with inspections and maintenance undertaken on these areas as required.

6.8 Waste Management

The current waste management practice on site utilises licensed waste contractors to incorporate recycling, in addition to the disposal of wastes in accordance with the waste provisions of the *Protection of the Environment Operations (Waste) Regulation 2014 (NSW EPA, 2014)*. There were no changes to the waste management system at Tinda Creek Sand Quarry during the report period.

7.0 Water Management

7.1 Groundwater

7.1.1 Groundwater Monitoring

Groundwater quality has been monitored at 11 bores on a six monthly basis at all groundwater monitoring bore locations shown on **Figure 7.1**.

During 2015, all groundwater monitoring undertaken at the site was conducted in accordance with the requirements of the site Groundwater Monitoring Program. A total of two monitoring events were undertaken at an approximate six monthly basis during 2015. The current water quality controls have not failed and as such no incident specific contingency plan has been required or submitted to Council.

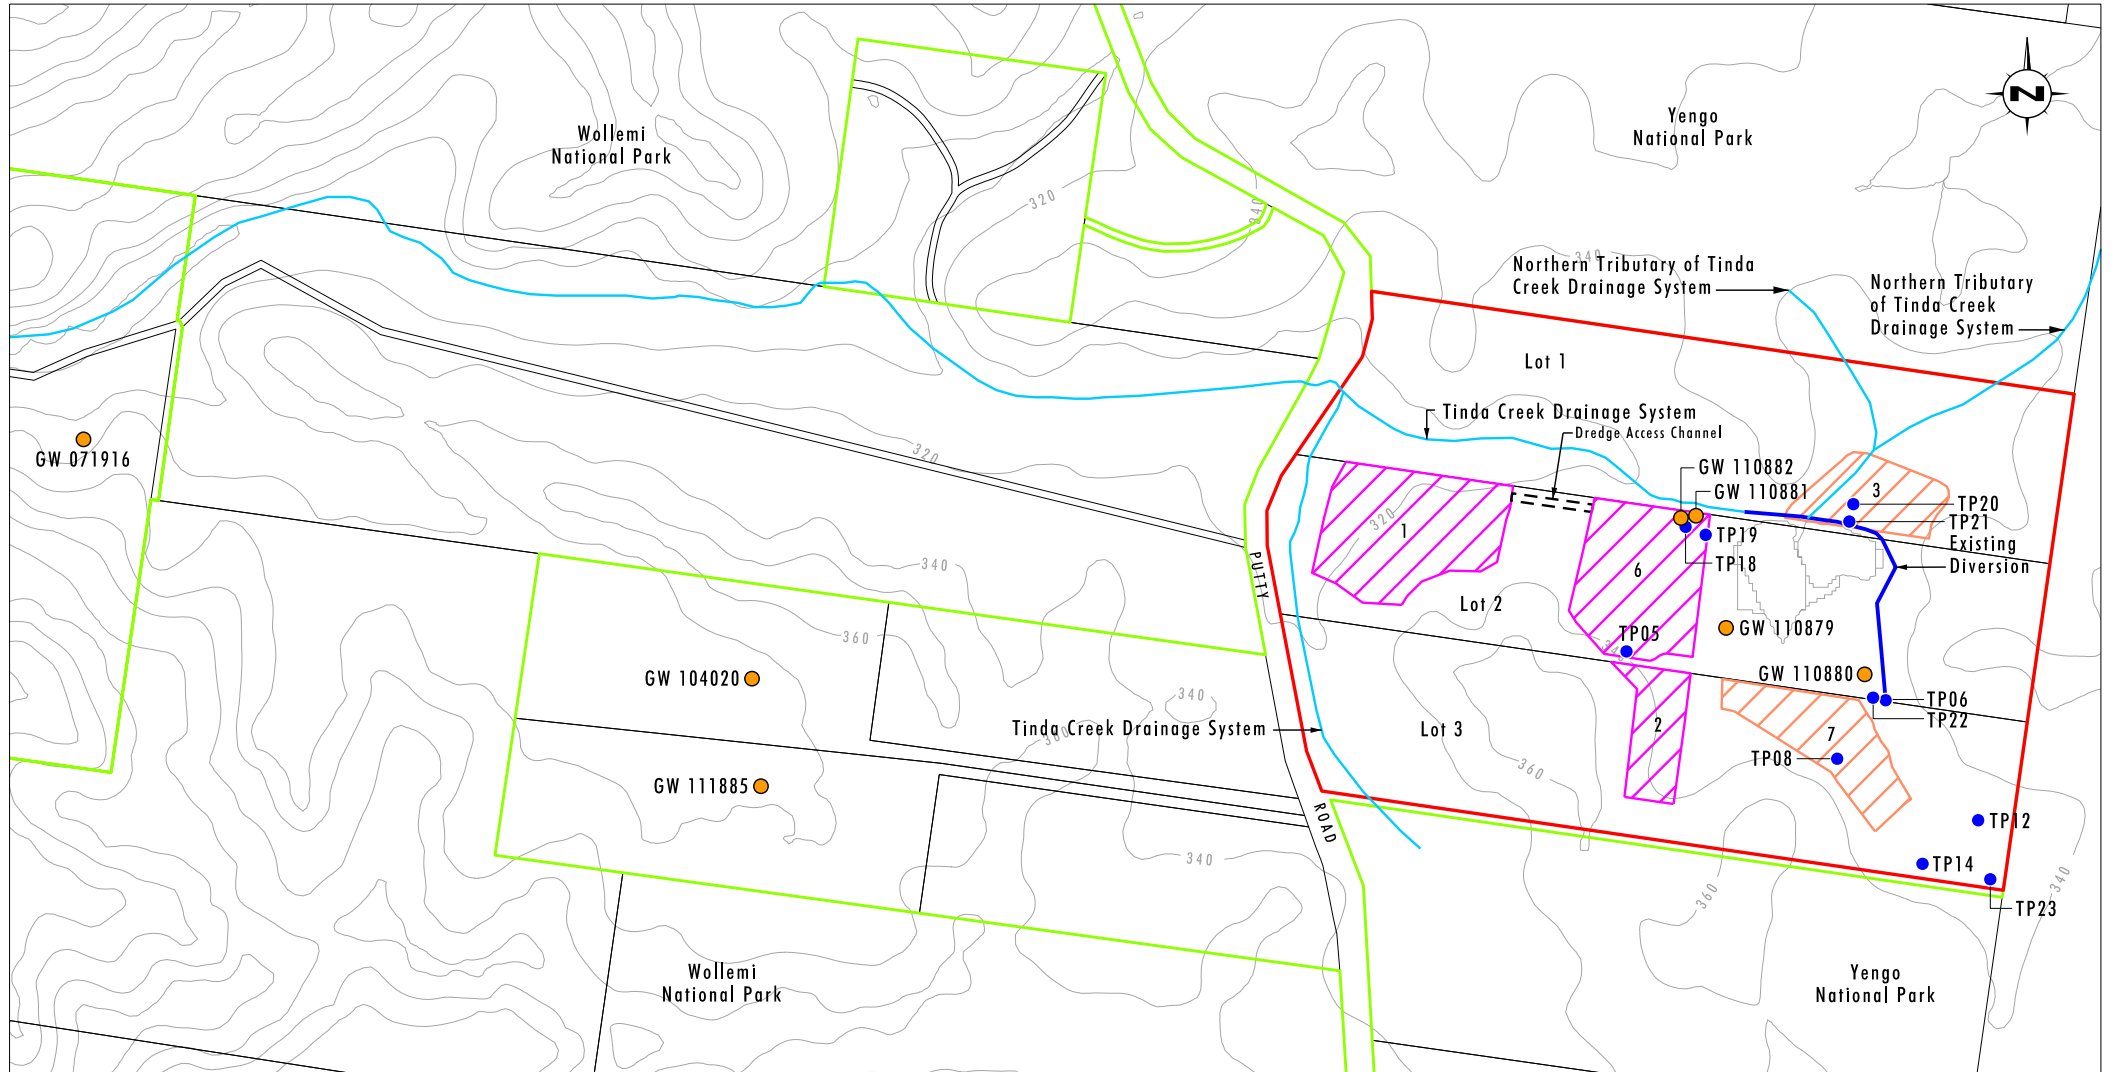

Water quality parameters that are currently being monitored and will continue to be monitored include:

- pH
- Conductivity
- Nitrate
- Ammonia
- TPH (now Total Recoverable Hydrocarbon – Silica).

Groundwater quality results for the period 2010 to 2015 are summarised in **Appendix 3**. Recorded groundwater levels are shown in **Tables 7.3** and **7.4**, onsite rainfall is recorded in **Section 6.3.1** and a summary of trigger values developed in analysis of previous data is presented in **Table 7.1**.

Historically, groundwater pH tends to be slightly acid due to the generation of organic acid from the breakdown of plant material with pH levels up to 6.7 being recorded during 2011 after a prolonged dry period. Lower levels of pH were recorded during the 2015 report period due to above average recorded rainfall with the highest pH level recorded at TP06 showing pH reading of 5.8. Conductivity is generally very low except for monitoring bore TP 06 at the start of the monitoring period which again occurred after a prolonged dry period. Following the above average rainfall recorded during the 2015 report period, conductivity in TP 06 has reduced to 85 $\mu\text{S}/\text{cm}$.

Available monitoring data indicates that quarry activities are not adversely impacting on groundwater quality which is generally very good and tends to fluctuate in response to changes in rainfall conditions. There were no exceedances of the trigger values during the 2015 report period.

| TPH (C29-C36) (ug/L) | <50 | 320 | N/A | 100 |

7.1.2 Groundwater Levels

Groundwater level is monitored monthly using the quarry's existing groundwater bore network. All groundwater levels were monitored in 2015 by manual dipping method to assess potential impacts from dredging activities on site.

A summary of maximum, average and minimum groundwater levels (metres Australian Height Datum (mAHD)) and depths (metres Below Ground Level (mBGL)) at the existing 11 monitoring locations for the period 2010 to 2015 are set out in **Tables 7.2** and **7.3** respectively. Trigger levels used to trigger investigations of groundwater levels relative to each of the monitoring bores are set out in **Table 7.4**. There were no exceedances of trigger levels during the 2015 report period.

¹TP18 bore collar height above ground has not been established. An average bore collar height of 0.62 m has been used

²Monitoring bores TP 05, TP 08, TP 18, TP 19, TP 20 and TP 21 are within extraction Domains and will be removed as quarrying progresses over the life of the quarry. These bores will be replaced by monitoring bores TP 44, TP 45, TP 46, TP 47, TP 48 and TP 49 with each of the bores being established at least 2 years in advance of quarrying commencing in the adjacent extraction Domain. Two additional bores TP 50 and TP 51 will also be established at the northern and western boundaries of the quarry area. Once these bores are established, relevant details will be updated over the following two years as more groundwater level information is recorded.

³Reference Bores shown in **bold**

As shown in **Tables 7.2** and **7.3**, recorded groundwater levels range from approximately 316.53 mAHD at Monitoring Bore TP19 adjacent to the southern boundary of the existing dredge pond to approximately 333.61 mAHD at Monitoring Bore TP05 at the southern extent of Domain 6 with variation in groundwater levels over the monitoring period. Total rainfall over the report period up to December 2015 was 1046.5 mm making the rainfall during the period of groundwater record above average. This followed on from a slightly below average rainfall year in 2014 when 627 mm was received. Trends in groundwater levels are presented graphically in **Graph 7.1**.

Groundwater monitoring undertaken for the project indicates that groundwater levels are typically 1 to 9 m below the surface in the area surrounding the existing and proposed quarry operations.

As shown on **Figure 7.1**, a series of three paired monitoring bores each approximately 50 m apart have been established around the perimeter of the existing quarry operation, those being:

- Monitoring Bores 19 and 18 immediately to the north-west
- Monitoring Bores 21 and 20 immediately to the north-east
- Monitoring Bores 22 and 6 immediately to the south-east.

Groundwater levels in the bores closest to the dredge pond are typically 1 to 2 m lower than in the adjoining paired bore during dry periods with the difference in water levels reducing during prolonged wet periods. Groundwater levels rose during the 2010 to 2015 monitoring period which received above average rainfall following on from the below average rainfall received in 2009 and 2014.

Analysis of the available monitoring data for monitoring bores TP22 (adjacent to the south-eastern corner of the dredging area), TP 6 approximately 50 m further from the dredge pond to the east of TP 22 and TP 14 approximately 500 m south-east of TP 14 shows that groundwater levels in all the bores respond similarly to rainfall. Monitoring indicates that groundwater levels in TP 14 are approximately 1 m higher than those in TP 22 and TP 06 in dry periods with the difference in groundwater level increasing to approximately 4 to 5 m after prolonged high rainfall events.

Graph 7.1 Groundwater Levels and Rainfall (October 2010 to December 2015)

7.1.3 Groundwater Usage

Hy-Tec holds groundwater bore licences for the site with a total approved extraction capacity of 55 million litres (ML) per year, comprising Licence 10WA112523 (WAL24381) (40 ML) and Licence 10WA112531 (WAL 24367) (15 ML).

Groundwater from production bores is used for makeup water for the dredge pond during prolonged dry periods and for dust suppression when insufficient water is available from the quarry's closed water management system. In June 2014 a meter was fitted to monitor groundwater usage from production bores. Since September 2015, the meter has been read on a monthly basis.

Groundwater usage for the period June 2014 when the meter was installed until December 2015 is set out in **Table 7.5**.

Table 7.5 Groundwater Usage from Production Bores

| Date | Meter Reading (KL) | Average Monthly Usage (ML) |
|-------------------|--------------------|----------------------------|
| June 2014 | 0 | - |
| 15 September 2015 | 3,464 | 0.23 |
| 30 October 2015 | 3,551 | 0.087 |
| 30 November 2015 | 3,638 | 0.087 |
| 30 December 2015 | 3,763 | 0.125 |

In October 2015, Hy-Tec started using water from the dredge pond for dust suppression, reducing the amount of clean water used on-site by approximately 3 ML/year. In addition, in November 2015 Hy-Tec sealed the haul road reducing the demand for water for dust suppression by approximately 10 ML per year.

Where possible, Hy-Tec will continue to use water from the dredge pond for all water needs on-site other than for potable use in the workshop and offices. Water from production bores may still be occasionally used for dust suppression however with sealing of the haul road this will only occur very occasionally and only when water cannot be accessed from the dredge pond system.

7.2 Surface Water

The quarry is located near the top of Tinda Creek catchment. The creek in this area has no base flows and only flows intermittently and for short durations in response to intense and prolonged rainfall events. Aquatic baseline monitoring of Tinda Creek was undertaken in 2008 and again in 2015. This monitoring indicated that quarrying had not adversely impacted on the condition of Tinda Creek with the condition of the creek in the vicinity of the quarry being consistent with that of the creek system in the surrounding area.

The quarry operations including pump lines and catch drains that collect and convey sediment laden runoff are all located within the closed water management system. This has enabled the quarry to operate over the past 30 years with minimal impact on surface water quality, the flow regime or habitat values within the Tinda Creek drainage system.

7.2.1 Closed Water Management System

To minimise potential for water quality impacts on Tinda Creek and the downstream Greater Blue Mountains World Heritage Area, the current quarry operations are serviced by a series of sediment dams and internal bunds that contain potential sediment laden runoff within the closed water management system that includes dredge ponds to prevent runoff from disturbed areas draining off-site.

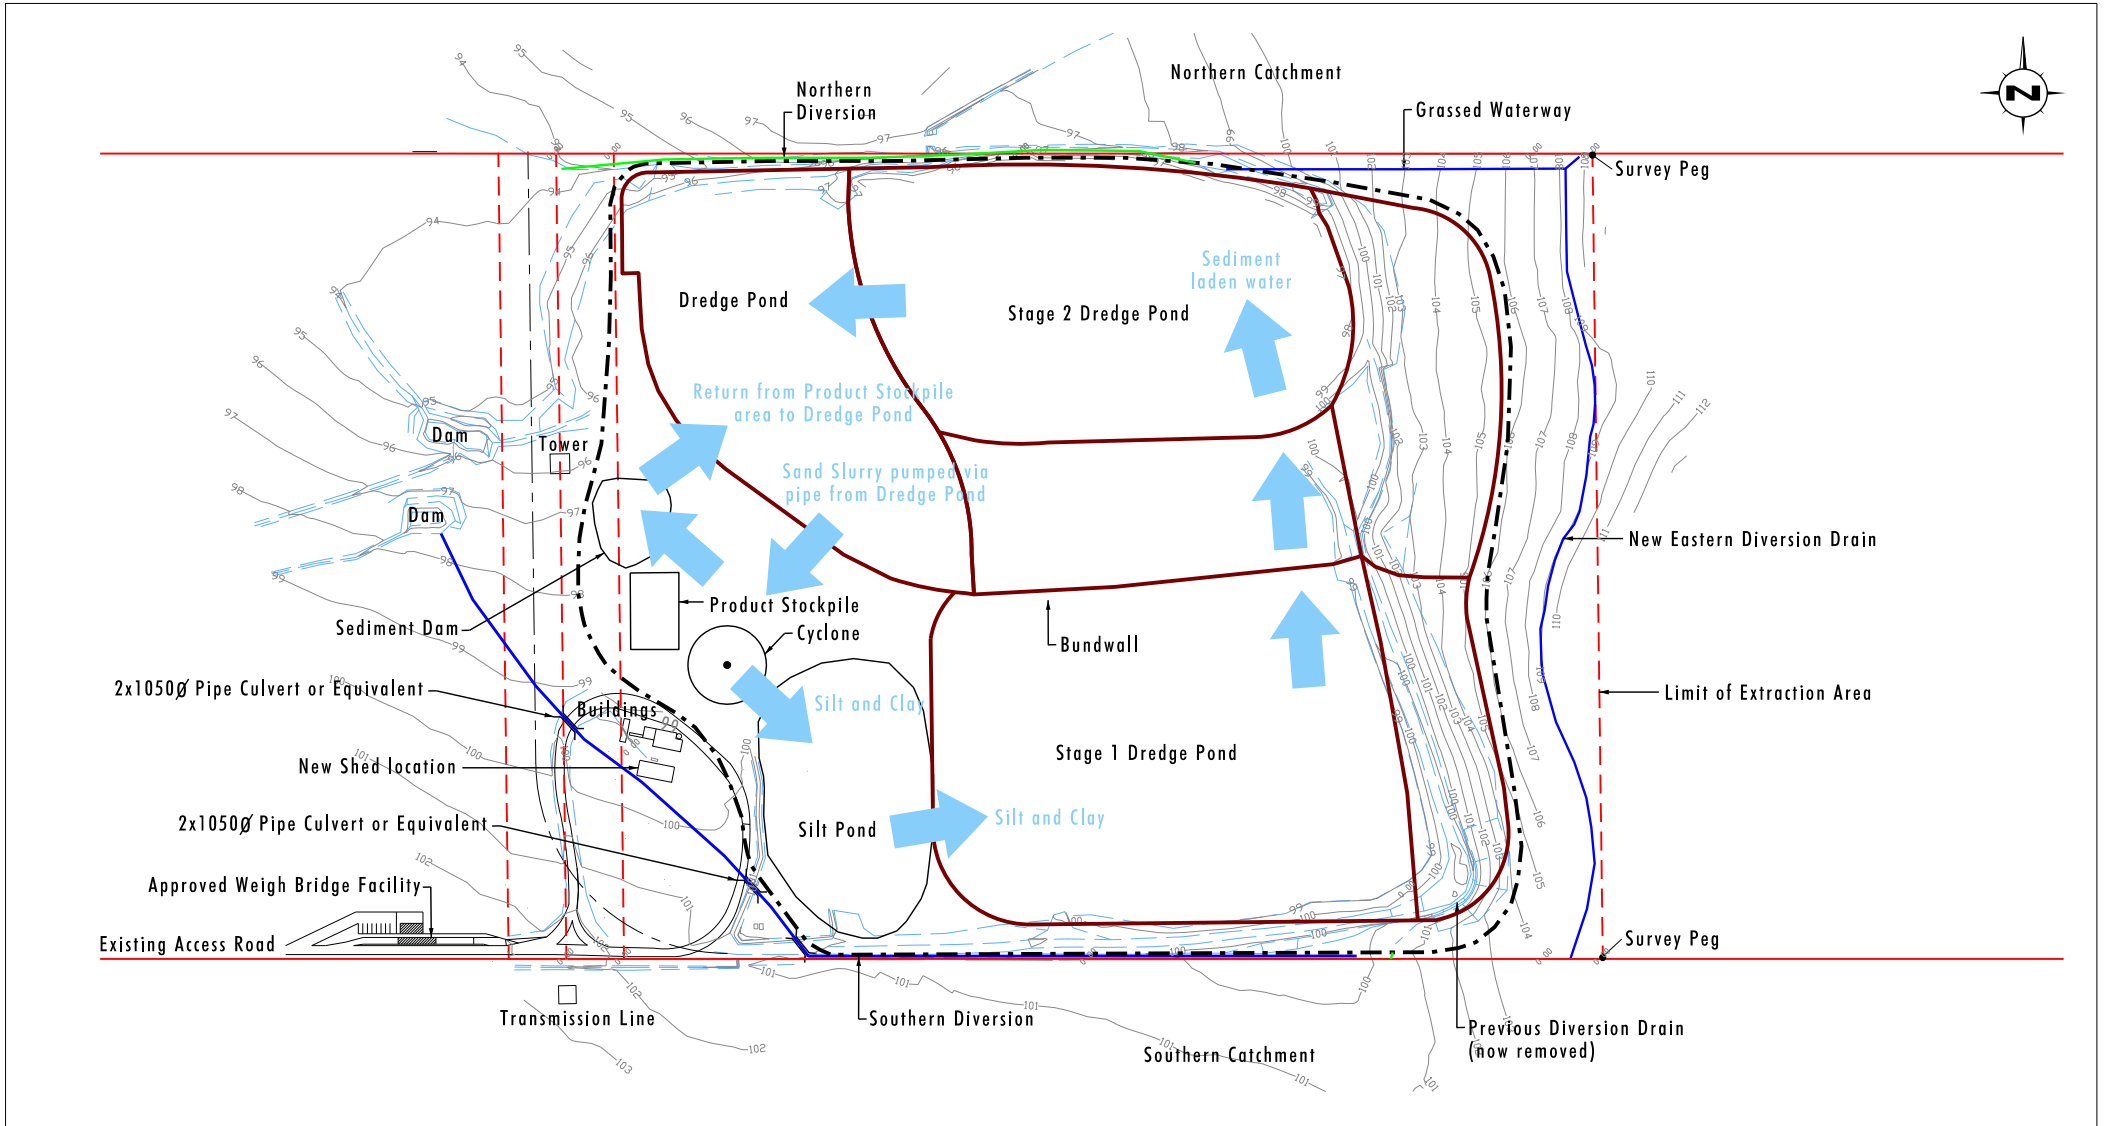

The dredge ponds have and will maintain sufficient surcharge capacity to contain the runoff from within the closed quarry water management system greater than would be generated from back to back (i.e. on consecutive days) 1 in 100 year Average Recurrence Interval rainfall events and hence have negligible capacity to discharge off site. This surcharge capacity will increase over the life of the quarry. The closed water management system is shown on **Figure 7.2**

7.2.2 Clean Water Diversion Drains

As shown on **Figure 7.3** a series of clean water diversions have been constructed around the perimeter of the quarry area. These include:

- Southern Diversion
- Southern Diversion Extension
- Existing Diversion.

These drains have been designed to convey runoff from a 1 in 100 year Average Recurrence Interval (ARI) 18 hour storm event and typically have a trapezoidal cross-section with a base width of 2 to 3 m and 3 Horizontal : 1 Vertical side batters. The drains are typically 1 to 1.5 m deep.

8.0 Rehabilitation

8.1 Rehabilitation of Disturbed Land

There was no rehabilitation activities undertaken during the report period

8.2 Annual Rehabilitation Inspection

An annual rehabilitation inspection was not undertaken during the report period.

8.3 Rehabilitation Trials and Research

No rehabilitation trials were undertaken during the report period.

8.4 Actions for the 2016 Report Period

During the 2016 report period, Tinda Creek Sand Quarry will seek to progressively rehabilitate any disturbed areas as soon as practicable following completion of disturbance activities. An annual rehabilitation inspection is also expected to be undertaken during the 2016 report period.

9.0 Complaints Record

9.1 Community Complaints

No complaints were received in regard to operations of Tinda Creek Sand Quarry Sand Quarry in 2015.

9.2 Community Liaison

There were no Community Consultative Committee (CCC) meetings held during the report period.

Table 9.1 Tinda Creek Sand Quarry CCC Members for the 2015 Report Period

| Name | Organisation |
|--------------|--------------------------------------|
| Lisa Andrews | Community representative/Chairperson |

10.0 Independent Audits

There were no independent audits undertaken at Tinda Creek Sand Quarry during the report period up to December 2015.

11.0 Incidents and Non-compliances during the 2015 Report Period

No incidents or non-compliances were recorded for the period up to December 2015.

12.0 Discrepancies between Predicted and Actual Results

No discrepancies between actual and predicted results were recorded for the period to December 2015.

13.0 Activities proposed in the 2016 Annual Review Period

Anticipated activities for Tinda Creek Sand Quarry during the 2016 report period include:

- progression of extraction operations in approved domains
- ongoing monitoring and maintenance of erosion and sediment controls and diversion drains
- commencement of rehabilitation activities where practical
- continued liaison with OEH regarding the Biodiversity Offsets Strategy
- implementation of conditions as prescribed under the Development Consent (SSD_4978).

14.0 Non-compliances

No non-compliances were recorded for the period up to December 2015.

APPENDIX 1

**Tinda Creek Sand Quarry Development
Consent SSD_4978**

Development Consent

Section 89E of the *Environmental Planning and Assessment Act 1979*

As delegate of the Minister for Planning, I approve the development application referred to in schedule 1, subject to the conditions in schedules 2 to 5.

These conditions are required to:

- prevent, minimise, and/or offset adverse environmental impacts;
- set standards and performance measures for acceptable environmental performance;
- require regular monitoring and reporting; and
- provide for the ongoing environmental management of the development.

David Kitto
Executive Director
Resource Assessments and Business Systems

DEFINITIONS

| | |
|----------------------------------|---|
| Annual Review | The review required by condition 4 of schedule 5 |
| Applicant | Aus-10 Rhyolite Pty Ltd, or any other person or persons who rely on this consent to carry out the development that is subject to this consent |
| ARI | Average Recurrence Interval |
| BCA | Building Code of Australia |
| Biodiversity Offset Strategy | The biodiversity offset strategy described in the EIS, and shown conceptually in Appendix 5 |
| CCC | Community Consultative Committee |
| Conditions of consent | Conditions contained in schedules 1 to 5 inclusive |
| Construction | The demolition of buildings or works, carrying out of works and erection of buildings covered by this consent |
| Council | Hawkesbury City Council |
| Day | The period from 7am to 6pm on Monday to Saturday, and 8am to 6pm on Sundays and Public Holidays |
| Department | Department of Planning and Environment |
| Development | The development described in the EIS |
| DRE | Division of Resources and Energy within NSW Trade and Investment |
| EIS | Environmental Impact Statement titled <i>Proposed Expansion of the Tinda Creek Sand Quarry</i> (3 volumes), dated July 2014, as modified by the Response to Submissions titled, <i>Response to Submissions for Proposed Expansion of Tinda Creek Sand Quarry</i> dated 7 November 2014 and the letter titled <i>Response to OEH, Department of Environment and Greater Blue Mountains World Heritage Advisory Committee on the Tinda Creek Sand Extraction Stated Significant Development Proposal</i> , dated 11 December 2014 |
| ENM | Excavated Natural Material, as defined by <i>Protection of the Environment Operations (Waste) Regulation 2014</i> |
| EP&A Act | <i>Environmental Planning and Assessment Act 1979</i> |
| EP&A Regulation | <i>Environmental Planning and Assessment Regulation 2000</i> |
| EPA | NSW Environment Protection Authority |
| EPL | Environment Protection Licence under the POEO Act |
| Evening | The period from 6pm to 10pm |
| Extension area | The area outside of the existing quarry footprint (i.e. Domains, 1,2,3,4,6 and 7, as shown conceptually in Appendices 1 and 2) |
| Extraction operations | Includes the removal of overburden and extraction, dredging, processing, handling, storage and transportation of extractive materials on site |
| Feasible | Feasible relates to engineering considerations and what is practical to build |
| GPS | Global Positioning System |
| Ha | Hectare |
| Incident | A set of circumstances that: <ul style="list-style-type: none"> • causes or threatens to cause material harm to the environment; and/or • breaches or exceeds the limits or performance measures/criteria in this consent |
| Land | As defined in the EP&A Act, except for where the term is used in the noise and air quality conditions in schedules 3 and 4 of this consent where it is defined to mean the whole of a lot, or contiguous lots, owned by the same landowner, in a current plan registered at the Land Titles Office at the date of this consent |
| Material harm to the environment | Actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial |
| m | Metres |
| Minister | Minister for Planning, or delegate |
| Mitigation | Activities associated with reducing the impacts of the development |
| Negligible | Small and unimportant, such as to be not worth considering |
| Night | The period from 10pm to 7am on Monday to Saturday, and 10pm to |

| | |
|--------------------------|--|
| NOW | 8am on Sundays and Public Holidays |
| NSW Trade and Investment | NSW Office of Water NSW Department of Trade and Investment, Regional Infrastructure and Services |
| OEH | NSW Office of Environment and Heritage |
| POEO Act | <i>Protection of the Environment Operations Act 1997</i> |
| Privately-owned land | Land that is not owned by a public agency or the Applicant (or its subsidiary) |
| Reasonable | Reasonable relates to the application of judgement in arriving at a decision, taking into account: mitigation benefits, cost of mitigation versus benefits provided, community views and the nature and extent of potential improvements |
| Rehabilitation | The restoration of land disturbed by the development to a good condition, ensuring that it is safe, stable and non-polluting and appropriately revegetated |
| RMS | Roads and Maritime Services |
| Secretary | Secretary of the Department, or nominee |
| Site | All land to which the development application applies, as listed under "Land" in schedule 1 and shown in Appendices 1 and 2 |
| Shoulder | The period between 6am to 7am on Monday to Friday and 7am to 8am on Saturday |
| Statement of commitments | The Applicant's commitments in Appendix 3 |
| VENM | Virgin Excavated Natural Material, as defined by the POEO Act |

**SCHEDULE 2
ADMINISTRATIVE CONDITIONS**

OBLIGATION TO MINIMISE HARM TO THE ENVIRONMENT

1. In addition to meeting the specific performance criteria established under this consent, the Applicant shall implement all reasonable and feasible measures to prevent and/or minimise any material harm to the environment that may result from the construction, operation, or rehabilitation of the development.

TERMS OF CONSENT

2. The Applicant shall carry out the development generally in accordance with the:
 - (a) EIS;
 - (b) Statement of Commitments; and
 - (c) conditions of this consent.

Note: The general layout of the development is shown in Appendix 2.

3. If there is any inconsistency between the above documents, the most recent document shall prevail to the extent of the inconsistency. However, the conditions of this consent shall prevail to the extent of any inconsistency.
4. The Applicant shall comply with any reasonable requirement/s of the Secretary arising from the Department's assessment of:
 - (a) any strategies, plans, programs, reviews, audits, reports or correspondence that are submitted in accordance with this consent;
 - (b) any reports, reviews or audits commissioned by the Department regarding compliance with this consent; or
 - (c) the implementation of any actions or measures contained in these documents.

LIMITS ON CONSENT

Extraction Operations

5. The Applicant may undertake extraction operations on the site until 31 December 2045.

Note: Under this consent, the Applicant is required to rehabilitate the site and carry out additional undertakings to the satisfaction of the Secretary. Consequently, this consent will continue to apply in all other respects other than the right to conduct extraction operations until the rehabilitation of the site and those undertakings have been carried out to a satisfactory standard.

Production Limits

6. The Applicant shall not:
 - (a) extract or process more than 300,000 tonnes of sand in any calendar year; or
 - (b) undertake extraction operations beyond 15 m below the natural ground surface.

Transportation Limits

7. The Applicant shall not:
 - (a) transport more than 300,000 tonnes of sand from the site in a calendar year; and
 - (b) dispatch more than 34 trucks per day or receive more than 34 trucks per day, averaged over a calendar month.

SURRENDER OF EXISTING DEVELOPMENT CONSENT

8. Within 6 months of the date of this consent, unless the Secretary agrees otherwise, the Applicant shall surrender the development consent (DA 0134/95) for the existing operations on the site in accordance with Section 104A of the EP&A Act.

Prior to the surrender of development consent DA 0134/95, the conditions of this consent shall prevail to the extent of any inconsistency with the conditions of that consent.

Note: This requirement does not extend to the surrender of construction and occupation certificates for existing and proposed building works under Part 4A of the EP&A Act. Surrendering of consent should not be understood as implying that works legally constructed under a valid consent can no longer be legally maintained or used.

STRUCTURAL ADEQUACY

9. The Applicant shall ensure that any new buildings and structures, and any alterations, or additions to existing buildings and structures, are constructed in accordance with the relevant requirements of the BCA.

Notes:

- *Under Part 4A of the EP&A Act, the Applicant is required to obtain construction and occupation certificates for the proposed building works.*
- *Part 8 of the EP&A Regulation sets out the requirements for the certification of the development.*

DEMOLITION

10. The Applicant shall ensure that all demolition work on site is carried out in accordance with *Australian Standard AS 2601-2001: The Demolition of Structures*, or its latest version.

PROTECTION OF PUBLIC INFRASTRUCTURE

11. The Applicant shall:
- (a) repair, or pay the full costs associated with repairing, any public infrastructure that is damaged by the development; and
 - (b) relocate, or pay the full costs associated with relocating, any public infrastructure that needs to be relocated as a result of the development.

Note: This condition does not apply to any damage to roads caused as a result of general road usage.

OPERATION OF PLANT AND EQUIPMENT

12. The Applicant shall ensure that all plant and equipment used on site is:
- (a) maintained in a proper and efficient condition; and
 - (b) operated in a proper and efficient manner.

UPDATING & STAGING STRATEGIES, PLANS OR PROGRAMS

13. With the approval of the Secretary, the Applicant may submit any strategies, plans or programs required by this consent on a progressive basis.

To ensure the strategies, plans or programs under the conditions of this consent are updated on a regular basis, the Applicant may at any time submit revised strategies, plans or programs to the Secretary for approval.

With the agreement of the Secretary, the Applicant may prepare any revised strategy, plan or program without undertaking consultation with all parties under the applicable condition of this consent.

Notes:

- *While any strategy, plan or program may be submitted on a progressive basis, the Applicant must ensure that the existing operations on site are covered by suitable strategies, plans or programs at all times.*
- *If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or program must clearly describe the specific stage to which the strategy, plan or program applies, the relationship of this stage to any future stages, and the trigger for updating the strategy, plan or program.*

14. Until they are replaced by an equivalent strategy, plan or program approved under this consent, the Applicant shall implement the existing strategies, plans or programs for the site that have been approved under DA 0134/95.

PRODUCTION DATA

15. The Applicant shall:
 - (a) provide annual quarry production data to DRE using the standard form for that purpose; and
 - (b) include a copy of this data in the Annual Review (see condition 4 of schedule 5).

DEVELOPER CONTRIBUTIONS

16. The Applicant shall pay Council road maintenance contributions consistent with Council's *Section 94 Contributions Plan*, or its latest version.

Note: If the parties are not able to agree on any aspect of the maintenance contributions, either party may refer the matter to the Secretary for resolution.

**SCHEDULE 3
ENVIRONMENTAL PERFORMANCE CONDITIONS**

IDENTIFICATION OF APPROVED LIMITS OF EXTRACTION

1. Prior to undertaking extraction operations under this consent, the Applicant shall:
 - (a) engage a registered surveyor to mark out the boundaries of the approved limits of extraction within the site; and
 - (b) submit a survey plan of these boundaries with applicable GPS coordinates to the Secretary.
2. While extraction operations are being carried out, the Applicant shall ensure that these boundaries are clearly marked at all times.

HOURS OF OPERATION

3. The Applicant shall comply with the operating hours set out in Table 1.

Table 1: Operating Hours

| Activity | Operating Hours |
|--------------------------------------|--|
| Extraction operations and deliveries | 7 am to 6 pm, Monday to Friday 7 am to 3 pm, Saturday No activities on Sundays or Public Holidays |
| Dispatch | 5 am to 10 pm, Monday to Friday 6 am to 3 pm, Saturday |
| Construction activities | 7 am to 6 pm, Monday to Friday 8 am to 1 pm, Saturday No construction to be undertaken on Sundays or Public Holidays |
| Maintenance activities | 24 hours a day, 7 days per week, providing maintenance activities are inaudible at any privately-owned residence |

NOISE

Noise Criteria

4. The Applicant shall ensure that the noise generated by the development does not exceed the criteria in Table 2 at any residence on privately-owned land.

Table 2: Noise criteria dB(A)

| Receiver | Day / Evening | Night | |
|-----------------|---------------------------------------|---------------------------------------|-----------------------------------|
| | <i>L_{Aeq(15 min)}</i> | <i>L_{Aeq(15 min)}</i> | <i>L_{A1(max)}</i> |
| All receivers | 35 | 35 | 45 |

Note: After the first review on any EPL granted for this development under Section 78 of the POEO Act, nothing in this consent prevents the EPA from imposing stricter noise limits on the extraction operations on site under the EPL.

Noise generated by the development is to be measured in accordance with the relevant requirements of the *NSW Industrial Noise Policy*. Appendix 6 sets out the metrological conditions under which these criteria apply and the requirements for evaluating compliance with these criteria.

However, these criteria do not apply if the Applicant has a written agreement with the relevant landowner/s to generate higher noise levels, and the Applicant has advised the Department in writing of the terms of this agreement.

Operating Conditions

5. The Applicant shall:
 - (a) implement all reasonable and feasible mitigation measures to minimise the construction, operational and road noise of the development;
 - (b) regularly assess noise monitoring data and relocate, modify and/or stop operations on site to ensure compliance with the noise criteria in this consent;

- (c) minimise the noise impacts of the development during meteorological conditions under which the noise criteria in this consent do not apply (see Appendix 6); and
- (d) carry out regular noise monitoring to determine whether the development is complying with the relevant conditions of this consent, to the satisfaction of the Secretary.

Noise Management Plan

6. The Applicant shall prepare and implement a Noise Management Plan for the development to the satisfaction of the Secretary. This plan must:
- (a) be prepared in consultation with the EPA, and be submitted to the Secretary within 6 months of the date of this consent, unless the Secretary agrees otherwise;
 - (b) describe the reasonable and feasible mitigation measures that would be implemented to ensure:
 - construction noise is minimised;
 - compliance with the relevant noise criteria and operating conditions in this consent;
 - best management practice is being employed; and
 - the noise impacts of the development are minimised during meteorological conditions under which the noise criteria in this consent do not apply;
 - (c) describe the proposed noise management system on site; and
 - (d) include a monitoring program that:
 - uses attended monitoring to evaluate the compliance of the development against the noise criteria in this consent;
 - evaluates and reports on the effectiveness of the noise management system and the best practice noise management measures; and
 - defines what constitutes a noise incident, and includes a protocol for identifying and notifying the Department and relevant stakeholders of any noise incidents.

AIR QUALITY

Air Quality Criteria

7. The Applicant shall implement all reasonable and feasible avoidance and mitigation measures so that particulate matter emissions generated by the development do not exceed the criteria in Tables 3 to 5 at any residence on privately-owned land.

Table 3: Long-Term Criteria for Particulate Matter

| Pollutant | Averaging period | ^d Criterion |
|--|-------------------------|-----------------------------------|
| Total suspended particulates (TSP) | Annual | ^a 90 µg/m ³ |
| Particulate matter < 10 µm (PM ₁₀) | Annual | ^a 30 µg/m ³ |

Table 4: Short-Term Criteria for Particulate Matter

| Pollutant | Averaging period | ^d Criterion |
|--|-------------------------|-----------------------------------|
| Particulate matter < 10 µm (PM ₁₀) | 24 hour | ^a 50 µg/m ³ |

Table 5: Long-Term Criteria for Deposited Dust

| Pollutant | Averaging Period | Maximum increase in deposited dust level | Maximum total deposited dust level |
|-----------------------------|-------------------------|---|---|
| ^c Deposited dust | Annual | ^b 2 g/m ² /month | ^a 4 g/m ² /month |

Notes to Tables 3-6:

^a Total impact (i.e. incremental increase in concentrations due to the development plus background concentrations due to all other sources).

^b Incremental impact (i.e. incremental increase in concentrations due to the development on its own).

^c Deposited dust is to be assessed as insoluble solids as defined by Standards Australia, AS/NZS 3580.10.1:2003: Methods for Sampling and Analysis of Ambient Air - Determination of Particulate Matter - Deposited Matter - Gravimetric Method.

^d Excludes extraordinary events such as bushfires, prescribed burning, dust storms, sea fog, fire incidents, illegal activities or any other activity agreed by the Secretary in consultation with EPA.

Operating Conditions

8. The Applicant shall:
- (a) implement all reasonable and feasible measures to minimise the dust emissions of the development;
 - (b) minimise surface disturbance of the site; and
 - (c) monitor and report on compliance with the relevant air quality criteria in this consent; to the satisfaction of the Secretary.

Air Quality Management Plan

9. The Applicant shall prepare and implement an Air Quality Management Plan for the development to the satisfaction of the Secretary. This plan must:
- (a) be prepared in consultation with the EPA, and be submitted to the Secretary for approval within 6 months of the date of this consent, unless the Secretary agrees otherwise;
 - (b) describe the measures that would be implemented to ensure:
 - compliance with the air quality criteria and operating conditions under this consent; and
 - best practice management is being employed
 - (c) include an air quality monitoring program that:
 - evaluates and reports on:
 - the effectiveness of the air quality management measures; and
 - compliance with the air quality criteria and operating conditions; and
 - defines what constitutes an air quality incident, and includes a protocol for identifying and notifying the Department and relevant stakeholders of any air quality incidents.

METEOROLOGICAL MONITORING

10. For the life of the development, the Applicant shall ensure that there is a suitable meteorological station operating in the vicinity of the site that complies with the requirements in the *Approved Methods for Sampling of Air Pollutants in New South Wales* guideline.

SOIL AND WATER

Note: Under the Water Act 1912 and/or the Water Management Act 2000, the Applicant is required to obtain the necessary water licences for the development, including in respect of the extraction and/or interception of groundwater.

Water Supply

11. The Applicant shall ensure that it has sufficient water for all stages of the development, and if necessary, adjust the scale of operations under the consent to match its available water supply to the satisfaction of the Secretary.

Operating Conditions

12. The Applicant shall:
- (a) comply with Section 120 of the POEO Act, unless an EPL authorises otherwise;
 - (b) ensure that the catchment of the water management system is not larger than 40 ha, unless the Secretary agrees otherwise;
 - (c) maintain the dredge and silt ponds to capture a 1 in 100 ARI storm event plus adequate freeboard to ensure no offsite discharge; and
 - (d) ensure that the loss of groundwater and surface water to Tinda Creek is no greater than predicted in the EIS.

Water Management Plan

13. The Applicant shall prepare and implement a Water Management Plan for the development to the satisfaction of the Secretary. This plan must:
- (a) be prepared by suitably qualified person/s approved by the Secretary;
 - (b) be prepared in consultation with the EPA and NOW, and be submitted to the Secretary for approval within 6 months of the date of this consent, unless the Secretary agrees otherwise;

- (c) include a Site Water Balance that:
 - includes details of the:
 - quantity of water required to support operations;
 - sources and security of water supply, clearly differentiating between surface water and groundwater, and taking into account rainfall variability;
 - water use and management on site;
 - reporting procedures; and
 - measures to minimise clean water use on site;
- (d) include a Surface Water Management Plan, that includes:
 - detailed baseline data on surface water flows and quality in the watercourses that could be affected by the development;
 - a detailed description of the surface water management system on site, including:
 - clean water diversions;
 - erosion and sediment controls;
 - the dirty water management system; and
 - water storages;
 - performance criteria, including trigger levels for investigating any potentially adverse surface water quality impacts;
 - the measures that would be implemented to ensure compliance with the surface water performance criteria and relevant operating conditions of this consent;
 - a program to monitor and report on:
 - any surface water discharges;
 - the effectiveness of the water management system; and
 - surface water flows and quality in local watercourses;
 - a comparison of monitoring results with modelled predictions;
- (e) include a Groundwater Monitoring Program, that includes:
 - detailed baseline data on groundwater levels, yield and quality in local aquifers and privately-owned groundwater bores;
 - performance criteria for surrounding aquifers, privately-owned groundwater bores, including trigger levels for investigating any potentially adverse groundwater impacts;
 - the measures that would be implemented to ensure compliance with the groundwater performance criteria and relevant operating conditions of this consent;
 - a program to monitor and report on:
 - groundwater inflows to the quarry pit (quarterly monitoring is required, unless otherwise agreed with the Secretary);
 - the impacts of the development on surrounding aquifers, privately-owned groundwater bores and Tinda Creek; and
 - a program to validate the groundwater model for the development, and compare monitoring results with modelled predictions; and
- (f) include a Surface and Groundwater Contingency Strategy, that includes:
 - a protocol for the investigation, notification and mitigation of identified exceedances of the surface water and groundwater impact assessment criteria;
 - measures to mitigate and/or compensate potentially affected landowners of privately-owned land, including provision of alternative long-term supply of water to the affected landowner that is equivalent to the loss attributed to the development; and
 - the procedures that would be followed if any unforeseen impacts are detected during the development.

HERITAGE

Heritage Management Plan

14. The Applicant shall prepare and implement a Heritage Management Plan for the development to the satisfaction of the Secretary. This plan must:
 - (a) be prepared in consultation with OEH, and Aboriginal stakeholders for matters relating to Aboriginal heritage values;
 - (b) be submitted to the Secretary for approval within 6 months of the date of this consent, unless the Secretary agrees otherwise;

- (c) describe the measures that would be implemented for:
- managing identified heritage objects, previously unidentified heritage objects or the discovery of any human remains on site; and
 - ensuring ongoing consultation with Aboriginal stakeholders in the conservation and management of any Aboriginal cultural heritage values on site.

LANDSCAPE AND REHABILITATION

Biodiversity Offset Strategy

15. The Applicant shall implement the biodiversity offset strategy described in the EIS, as summarised and revised in Table 6, and shown conceptually in Appendix 5, to the satisfaction of the Secretary.

Table 6: Biodiversity Offset Strategy (ha)

| Area | Offset Type | Minimum Size (ha) |
|---------------------|------------------------------------|-------------------|
| On-site Offset Area | Existing vegetation to be enhanced | 106.6 |

Security of Offsets

16. Within 2 years of this consent, unless otherwise agreed with the Secretary, the Applicant shall make suitable arrangements to provide appropriate long-term security for the offset area, to the satisfaction of the Secretary.

Note: Mechanisms to provide appropriate long-term security to the land within the biodiversity offset strategy include a Biobanking Agreement, Voluntary Conservation Agreement or an alternative mechanism that provides for a similar conservation outcome. Any mechanism must remain in force in perpetuity.

Rehabilitation Objectives

17. The Applicant shall rehabilitate the site to the satisfaction of the Secretary. The final landform must:
- be generally consistent with the proposed rehabilitation strategy in the EIS, and the final landform shown conceptually in Appendices 4 and 5. and
 - comply with the objectives in Table 7.

Table 7: Rehabilitation Objectives

| Feature | Objective |
|------------------------|--|
| Site (as a whole) | <ul style="list-style-type: none"> • Safe, stable and non-polluting • Restore ecosystem function, including maintaining or establishing self-sustaining ecosystems comprised of local native species and habitat, including at least 0.35 ha of Mellong Sandmass Sedgeland |
| Surface Infrastructure | <ul style="list-style-type: none"> • To be decommissioned and removed (unless the Secretary agrees otherwise) |
| Final Voids | <ul style="list-style-type: none"> • Minimise the size, depth, batter slope and the drainage catchment of the final void • Ensure that the volume of VENM and ENM detailed in the EIS is imported for rehabilitation of the site • Ensure that the surface area of the final voids is no greater than 16 ha in total • Separated from the surface water drainage system, unless the Secretary agrees otherwise |
| Watercourses | <ul style="list-style-type: none"> • Restore alignment and hydraulic function, as far as practical |
| Community | <ul style="list-style-type: none"> • Ensure public safety |

Progressive Rehabilitation

18. The Applicant shall rehabilitate the site progressively, that is, as soon as reasonably practicable following disturbance. Interim stabilisation measures must be implemented where reasonable and feasible to control erosion (both wind and water) in disturbed areas that are not active and which are not ready for final rehabilitation.

Landscape Management Plan

19. The Applicant shall prepare and implement a Landscape Management Plan for the development to the satisfaction of the Secretary. This plan must:
- (a) be prepared in consultation with OEH, and be submitted to the Secretary for approval within 6 months of the date of this consent, unless the Secretary agrees otherwise;
 - (b) provide details of the conceptual final landform and associated land uses for the site;
 - (c) describe how the implementation of the biodiversity offset strategy would be integrated with the overall rehabilitation of the site;
 - (d) include detailed performance and completion criteria for evaluating the performance of the biodiversity offset strategy and rehabilitation of the site, including triggers for any necessary remedial action;
 - (e) describe the short, medium and long term measures that would be implemented to:
 - manage remnant vegetation and habitat on site and in the offset area; and
 - ensure compliance with the rehabilitation objectives and progressive rehabilitation obligations in this consent;
 - (f) include a detailed description of the measures that would be implemented over the next 3 years (to be updated for each 3 year period following initial preparation of the plan) including the procedures to be implemented for:
 - maximising the salvage of environmental resources within the approved disturbance area, including tree hollows, vegetative and soil resources, for beneficial reuse in the enhancement of the offset area or site rehabilitation;
 - restoring and enhancing the quality of native vegetation and fauna habitat in the biodiversity and rehabilitation areas through assisted natural regeneration, targeted vegetation establishment and the introduction of fauna habitat features;
 - protecting vegetation and fauna habitat outside the approved disturbance area on-site;
 - minimising the impacts on native fauna, including undertaking pre-clearance surveys;
 - ensure only appropriate activities occur within a 40 m buffer of the recorded small-flower grevillea (*Grevillea parviflora* subsp. *parviflora*), (refer Figure 2 in Appendix 5);
 - establishing vegetation screening to minimise the visual impacts of the site on surrounding receivers;
 - ensuring minimal environmental consequences for threatened species, populations and habitats;
 - collecting and propagating seed;
 - controlling weeds and feral pests;
 - controlling erosion;
 - controlling access; and
 - managing bushfire risk;
 - (g) include a Koala Management Plan prepared generally in accordance with SEPP 44, the accompanying guidelines provided in *Circular B35 - State Environmental Planning Policy 44 - Koala Habitat Protection, the NPWS Policy and Procedure Statement No. 9 – Policy for the Translocation of Threatened Fauna in NSW* and the draft koala plan of management in the EIS;
 - (h) include a program to monitor and report on the effectiveness of these measures, and progress against the performance and completion criteria;
 - (i) identify the potential risks to the successful implementation of the biodiversity offset, and include a description of the contingency measures that would be implemented to mitigate these risks; and
 - (j) include details of who would be responsible for monitoring, reviewing, and implementing the plan.

Conservation and Rehabilitation Bond

20. Within 6 months of the approval of the Landscape Management Plan, the Applicant shall lodge a Conservation and Rehabilitation Bond with the Department to ensure that the biodiversity offset strategy and rehabilitation of the site are implemented in accordance with the performance and completion criteria set out in the plan and relevant conditions of this consent. The sum of the bond shall be determined by:
- (a) calculating the cost of implementing the biodiversity offset strategy over the next 3 years;
 - (b) calculating the cost of rehabilitating the site, taking into account the likely surface disturbance over the next 3 years of extraction operations; and
 - (c) employing a suitably qualified quantity surveyor or other expert to verify the calculated costs, to the satisfaction of the Secretary.

Notes:

- *Alternative funding arrangements for long term management of the biodiversity offset strategy, such as provision of capital and management funding as agreed by OEH as part of a Biobanking Agreement or transfer to conservation reserve estate can be used to reduce the liability of the conservation and biodiversity bond.*
 - *If capital and other expenditure required by the Landscape Management Plan is largely complete, the Secretary may waive the requirement for lodgement of a bond in respect of the remaining expenditure.*
 - *If the biodiversity offset strategy and rehabilitation of the site area are completed to the satisfaction of the Secretary, then the Secretary will release the bond. If the biodiversity offset strategy and rehabilitation of the site are not completed to the satisfaction of the Secretary, then the Secretary will call in all or part of the bond, and arrange for the completion of the relevant works.*
21. Within 3 months of each Independent Environmental Audit (see condition 9 of schedule 5), the Applicant shall review, and if necessary revise, the sum of the Conservation and Rehabilitation Bond to the satisfaction of the Secretary. This review must consider the:
- (a) effects of inflation;
 - (b) likely cost of implementing the biodiversity offset strategy and rehabilitating the site (taking into account the likely surface disturbance over the next 3 years of the development); and
 - (c) performance of the implementation of the biodiversity offset strategy and rehabilitation of the site to date.

TRANSPORT

Monitoring of Product Transport

22. The Applicant shall keep accurate records of all laden truck movements to and from the site (hourly, daily, weekly, monthly and annually) and publish these records on its website every 6 months.

Operating Conditions

23. The Applicant shall ensure that:
- (a) all laden vehicles have appropriate signage, including a contact phone number, so they be easily identified by road users;
 - (b) all laden vehicles entering or exiting the site have their loads covered;
 - (c) all laden vehicles exiting the site are cleaned of sand and other material that may fall on the road, before leaving the site; and
 - (d) no trucks queue at the entrance to the site before 6am.

Access Road and Intersection Construction

24. Within 12 months from the date of this consent, unless the Secretary agrees otherwise, the Applicant shall upgrade the site access road and its intersection with Putty Road in accordance with applicable AUSTROADS standards, and to the satisfaction of RMS.

Transport Management Plan

25. The Applicant shall prepare and implement a Transport Management Plan for the development to the satisfaction of the Secretary. This plan must:
- (a) be prepared in consultation with RMS and Council, and be submitted to the Secretary for approval within 6 months of the date of this consent, unless the Secretary agrees otherwise;
 - (b) include a drivers Code of Conduct for heavy vehicle drivers; and
 - (c) describe the measures that would be put in place to ensure compliance with the drivers' code of conduct and include a program to monitor the effectiveness of the implementation of these measures.

VISUAL

26. The Applicant shall:
- (a) implement all reasonable and feasible measures to minimise the visual and off-site lighting impacts of the development on local residences and road users; and
 - (b) ensure that all external lighting associated with the development complies with the relevant Australian Standards, including *Australian Standard AS4282 (INT) 1997 – Control of Obtrusive Effects of Outdoor Lighting* or its latest version, to the satisfaction of the Secretary.

BUSHFIRE MANAGEMENT

27. The Applicant shall ensure that the development is suitably equipped to respond to any fires on site; and assist the Rural Fire Service, emergency services and National Parks and Wildlife Service as much as practicable if there is a fire in the surrounding area.

WASTE

28. The Applicant shall ensure that only certified VENM and ENM is imported to the site to aid in the minimisation of final voids.
29. The Applicant shall manage on-site sewage treatment and disposal in accordance with the requirements of its EPL, and to the satisfaction of the EPA and Council.
30. The Applicant shall:
- (a) minimise the waste generated by the development;
 - (b) ensure that the waste generated by the development is appropriately stored, handled, and disposed of; and
 - (c) report on waste management and minimisation in the Annual Review, to the satisfaction of the Secretary.

**SCHEDULE 4
ADDITIONAL PROCEDURES**

NOTIFICATION OF LANDOWNERS

1. As soon as practicable after obtaining monitoring results showing an exceedance of any relevant criteria in schedule 3, the Applicant shall notify affected landowners in writing of the exceedance, and provide regular monitoring results to each affected landowner until the development is again complying with the relevant criteria.

INDEPENDENT REVIEW

2. If an owner of privately-owned land considers the development to be exceeding the relevant criteria in schedule 3, then he/she may ask the Secretary in writing for an independent review of the impacts of the development on his/her land.

If the Secretary is satisfied that an independent review is warranted, then within 2 months of the Secretary's decision the Applicant shall:

- (a) commission a suitably qualified, experienced and independent person, whose appointment has been approved by the Secretary, to:
 - consult with the landowner to determine his/her concerns;
 - conduct monitoring to determine whether the development is complying with the relevant criteria in schedule 3; and
 - if the development is not complying with these criteria then identify the measures that could be implemented to ensure compliance with the relevant criteria; and
- (b) give the Secretary and landowner a copy of the independent review.

**SCHEDULE 5
ENVIRONMENTAL MANAGEMENT, REPORTING AND AUDITING**

ENVIRONMENTAL MANAGEMENT

Environmental Management Strategy

1. The Applicant shall prepare and implement an Environmental Management Strategy for the development to the satisfaction of the Secretary. This strategy must:
 - (a) be submitted to the Secretary for approval within 6 months of the date of this consent;
 - (b) provide the strategic framework for environmental management of the development;
 - (c) identify the statutory approvals that apply to the development;
 - (d) describe the role, responsibility, authority and accountability of all key personnel involved in the environmental management of the development;
 - (e) describe the procedures that would be implemented to:
 - keep the local community and relevant agencies informed about the operation and environmental performance of the development;
 - receive, handle, respond to, and record complaints;
 - resolve any disputes that may arise during the course of the development;
 - respond to any non-compliance;
 - respond to emergencies; and
 - (f) include:
 - copies of any strategies, plans and programs approved under the conditions of this consent; and
 - a clear plan depicting all the monitoring required to be carried out under the conditions of this consent.

Adaptive Management

2. The Applicant shall assess and manage development-related risks to ensure that there are no exceedances of the criteria and/or performance measures in schedule 3. Any exceedance of these criteria and/or performance measures constitutes a breach of this consent and may be subject to penalty or offence provisions under the EP&A Act or EP&A Regulation.

Where any exceedance of these criteria and/or performance measures has occurred, the Applicant shall, at the earliest opportunity:

- (a) take all reasonable and feasible measures to ensure that the exceedance ceases and does not recur;
- (b) consider all reasonable and feasible options for remediation (where relevant) and submit a report to the Department describing those options and any preferred remediation measures or other course of action; and
- (c) implement remediation measures as directed by the Secretary; to the satisfaction of the Secretary.

Management Plan Requirements

3. The Applicant shall ensure that the management plans required under this consent are prepared in accordance with any relevant guidelines, and include:
 - (a) detailed baseline data;
 - (b) a description of:
 - the relevant statutory requirements (including any relevant approval, licence or lease conditions);
 - any relevant limits or performance measures/criteria; and
 - the specific performance indicators that are proposed to be used to judge the performance of, or guide the implementation of, the development or any management measures;
 - (c) a description of the measures that would be implemented to comply with the relevant statutory requirements, limits, or performance measures/criteria;
 - (d) a program to monitor and report on the:
 - impacts and environmental performance of the development; and
 - effectiveness of any management measures (see (c) above);
 - (e) a contingency plan to manage any unpredicted impacts and their consequences;

- (f) a program to investigate and implement ways to improve the environmental performance of the development over time;
- (g) a protocol for managing and reporting any:
 - incidents;
 - complaints;
 - non-compliances with statutory requirements; and
 - exceedances of the impact assessment criteria and/or performance criteria; and
- (h) a protocol for periodic review of the plan.

Note: The Secretary may waive some of these requirements if they are unnecessary or unwarranted for particular management plans.

Annual Review

4. By the end of December each year, or other timing as may be agreed by the Secretary, the Applicant shall review the environmental performance of the development to the satisfaction of the Secretary. This review must:
 - (a) describe the development (including rehabilitation) that was carried out in the previous calendar year, and the development that is proposed to be carried out over the current calendar year;
 - (b) include a comprehensive review of the monitoring results and complaints records of the development over the previous calendar year, which includes a comparison of these results against:
 - the relevant statutory requirements, limits or performance measures/criteria;
 - the monitoring results of previous years; and
 - the relevant predictions in the EIS;
 - (c) identify any non-compliance over the last year, and describe what actions were (or are being) taken to ensure compliance;
 - (d) identify any trends in the monitoring data over the life of the development;
 - (e) identify any discrepancies between the predicted and actual impacts of the development, and analyse the potential cause of any significant discrepancies; and
 - (f) describe what measures will be implemented over the current calendar year to improve the environmental performance of the development.

Revision of Strategies, Plans and Programs

5. Within 3 months of a modification to this consent or following the submission of an:
 - (a) annual review under condition 4 above;
 - (b) incident report under condition 7 below; or
 - (c) audit report under condition 9 below,
 the Applicant shall review, and if necessary revise, the strategies, plans, and programs required under this consent to the satisfaction of the Secretary.

Note: This is to ensure the strategies, plans and programs are updated on a regular basis, and incorporate any recommended measures to improve the environmental performance of the development.

Community Consultative Committee

6. The Applicant shall establish and operate a Community Consultative Committee (CCC) for the development to the satisfaction of the Secretary. This CCC must be operated in general accordance with the *Guidelines for Establishing and Operating Community Consultative Committees for Mining Developments* (Department of Planning, 2007, or its latest version), and be operating within 6 months of the date of this consent.

Notes:

- *The CCC is an advisory committee. The Department and other relevant agencies are responsible for ensuring that the Applicant complies with this consent.*
- *In accordance with the guideline, the Committee should comprise an independent chair and appropriate representation from the Applicant, Council and the local community.*

REPORTING

Incident Reporting

7. The Applicant shall immediately notify the Secretary and any other relevant agencies of any incident that has caused, or threatens to cause, material harm to the environment. For any other incident associated with the Development, the Applicant shall notify the Secretary. Within 7 days of the date of the incident, the Applicant shall provide the Secretary and any relevant agencies with a detailed report on the incident, and such further reports as may be requested.

Regular Reporting

8. The Applicant shall provide regular reporting on the environmental performance of the development on its website, in accordance with the reporting arrangements in any plans or programs approved under the conditions of this consent.

INDEPENDENT ENVIRONMENTAL AUDIT

9. Within a year of the date of this consent, and every 3 years thereafter, unless the Secretary directs otherwise, the Applicant shall commission and pay the full cost of an Independent Environmental Audit of the development. This audit must:
 - (a) be conducted by suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Secretary;
 - (b) include consultation with the relevant agencies, Council and the CCC;
 - (c) assess the environmental performance of the development and whether it is complying with the relevant requirements in this consent and any relevant EPL and/or Water Licence (including any assessment, plan or program required under these approvals);
 - (d) review the adequacy of any approved strategy, plan or program required under these approvals; and
 - (e) recommend measures or actions to improve the environmental performance of the development, and/or any assessment, plan or program required under these approvals.

Note: This audit team must be led by a suitably qualified auditor and include experts in any fields specified by the Secretary.

10. Within 6 weeks of the completion of this audit, unless the Secretary agrees otherwise, the Applicant shall submit a copy of the audit report to the Secretary, together with its response to any recommendations contained in the audit report, including a timetable for the implementation of any measures proposed to address the recommendations in the audit report. If the Applicant intends to defer the implementation of a recommendation, reasons must be documented.

ACCESS TO INFORMATION

11. Within 6 months of the date of this consent, the Applicant shall:
 - (a) make copies of the following publicly available on its website:
 - the EIS;
 - current statutory approvals for the development;
 - approved strategies, plans and programs required under the conditions of this consent;
 - a comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs;
 - a complaints register, which is to be updated monthly;
 - minutes of CCC meetings;
 - the annual reviews of the development (for the last 5 years);
 - any independent environmental audit of the development, and the Applicant's response to the recommendations in any audit;
 - any other matter required by the Secretary; and
 - (b) keep this information up-to-date, to the satisfaction of the Secretary.

Figure 1: Development Layout

APPENDIX 3 STATEMENT OF COMMITMENTS

5.0 Draft Statement of Commitments

The DGRs for the proposal (**Appendix 1**) require that the EIS include a Draft Statement of Commitments which details the measures proposed by Hy-Tec for environmental mitigation, management and monitoring.

If approval is granted under the EP&A Act for the proposal, Hy-Tec will commit to the controls detailed below.

5.1 Compliance with the EIS

5.1.1 To carry out the development for the Project generally in accordance with the Development Application and this EIS.

5.2 Life of Operation, Production and Hours of Operations

Project Life

5.2.1 The Project approval life will be for an additional 30 years from the date of commencement of operations under the Project Approval. Closure and rehabilitation activities will be undertaken in accordance with a detailed Quarry Closure Plan, at the time of closure. These works may extend beyond the 30 year operational approval period.

Production Limits

5.2.2 A maximum of 300,000 tonnes per year of sand products will be transported from the quarry.

Hours of Operation

5.2.3 Quarry operations will be undertaken between the hours of 5.00 am and 10.00 pm Monday to Friday and 5.00 am and 3.00 pm on Saturdays.

5.2.4 The following activities may occur on Sundays and public holidays:

- maintenance of fixed plant and mobile plant;
- product stockpile management;
- water cart operations for stockpile area and plant area; and
- pumping for dewatering activities.

5.3 Environmental Management, Monitoring and Reporting

Environmental Management Plan

5.3.1 Within six months of development consent, Hy-Tec will revise its existing Environmental Management Plan (EMP) as part of the implementation of the Project. The EMP will include details of all of the management and monitoring

commitments outlined in the EIS (specifically those outlined in this Statement of Commitments).

Annual Review

- 5.3.2 Hy-Tec will prepare an Annual Review of the environmental performance of the Project and will make this available to the public, Hawkesbury City Council and relevant government agencies as required.

5.4 Ecology

A range of mitigation measures are proposed to ameliorate potential adverse ecological impacts associated with the Project. These include:

- 5.4.1 Implement a robust weed management program to be documented in the revised EMP.
- 5.4.2 Conduct rehabilitation progressively over the life of the quarry. All rehabilitation works will be scheduled to commence as soon as practicable after disturbance and reformation of the landscape.
- 5.4.3 A robust tree felling procedure will be implemented at Tinda Creek Quarry to minimise the potential for impacts on native fauna species (including threatened species) as a result of the clearing of hollow-bearing trees.
- 5.4.4 Nest boxes will be established in retained vegetation in proximity to area impacted as a result of the Project to mitigate the loss of hollow-bearing trees. An assessment of the number of tree hollows lost during clearing will be made as part of the tree felling activities and nest boxes will be established to compensate for this loss, where appropriate. Suitably designed nest boxes will be established for the range of hollow-dependent species that are known to occur in the Project area.
- 5.4.5 A pre-clearance survey of the proposed disturbance areas will be undertaken prior to ground disturbance (within seven days of the planned disturbance) to ensure that no Rosenberg's Goanna burrows are present. The assessment should be undertaken by a suitably qualified and licensed ecologist. If burrows are present, the ecologist will provide advice on how to ensure that no goannas remain within the burrows during the clearing process.
- 5.4.6 A pre-clearance survey of all areas to be cleared will be undertaken (within seven days of the planned clearing time) to ensure that no termite mounds used by Rosenberg's Goannas are present. The assessment should be undertaken by a suitably qualified and licensed ecologist. If termite mounds are present, the ecologist will provide advice on how to ensure that no goanna eggs or juveniles remain within the mounds during the clearing process.
- 5.4.7 A comprehensive biodiversity offset strategy is to be implemented for the Project as described in **Appendix 7** to ensure the development maintains or improves the terrestrial and aquatic biodiversity values of the region in the medium to long-term.

5.5 Aboriginal Heritage

It is noted that archaeological subsurface investigation is not necessary within the proposed extraction domains, prior to the quarry expansion proceeding. However, a range of mitigation measures are proposed to ameliorate potential adverse archaeological impacts associated with the Project. These include:

- 5.5.1 In consultation with the registered Aboriginal parties, prepare an Aboriginal Cultural Heritage Management Plan (ACHMP) for the proposed Project. The ACHMP will allow for management (collection) of the artefacts located in the Tinda Creek Artefact Scatter 1 site in Domain 3 (if Domain 3 is to be quarried) and to provide for future management of Aboriginal cultural heritage issues should they arise across the broader Project area. The ACHMP will form part of the revised EMP for the project.
- 5.5.2 If Domain 3 is to be quarried, the artefacts located within the Tinda Creek Artefact Scatter 1 site are collected using the methodology set out in the protocols and procedures of the approved ACHMP.
- 5.5.3 The EMP is to be updated to contain provisions to address management of the following issues, as detailed in the Aboriginal Cultural Heritage and Archaeological Assessment (**Appendix 9**):
- exposure of previously unrecorded artefactual material during ground disturbance works within the Project area;
 - exposure of human/possible human skeletal material during ground disturbance works within the Project area;
 - exposure of sandstone with evidence of Aboriginal engravings or grinding grooves; and
 - development of an Aboriginal Cultural Heritage Training Package for all Hy-Tec employees/contractors working on the Project to be provided as part of the quarry induction process.

5.6 Historic Heritage

- 5.6.1 In the unlikely event that unexpected archaeological remains or potential heritage items not identified as part of this assessment are discovered during the Project and are likely to be disturbed by the Project, all works in the immediate area should cease, the remains and potential impacts should be assessed by a qualified archaeologist or heritage consultant and, if necessary, the Heritage Branch, Department of Planning notified.

5.7 Traffic and Access

- 5.7.1 The site access will be upgraded to comply with the minor road standard access as detailed in AS2890.2.

5.8 Noise

- 5.8.1 Hy-Tec will undertake an attended noise monitoring program (as detailed in **Section 4.7.6.1**) in order to assess ongoing compliance with relevant noise impact assessment criteria over the life of the Project. Details of the Noise Management Plan will be provided in the revised EMP.
- 5.8.2 The monitoring results will be reviewed by the Hy-Tec environmental representative to assess compliance with the Noise Impact Assessment (NIA) predictions and with the relevant NIA criteria. The results will be reported in accordance with the requirements of the Project approval and EPL.

5.9 Air Quality

- 5.9.1 The existing dust control measures will continue to be implemented on site, including:
- minimisation of the total disturbed/working areas at any one time; and
 - watering of unsealed roads, working areas and stockpiles as required.

5.10 Surface Water and Groundwater

- 5.10.1 Hy-Tec will continue to undertake monitoring of groundwater bores in accordance with existing licence conditions.
- 5.10.2 All diversion drains will continue to be maintained in good condition.
- 5.10.3 The water management system will remain as a closed system.

5.11 Greenhouse Gas and Energy

- 5.11.1 Hy-Tec will continue to participate in the Energy Efficiency Opportunities (EEO) Program and undertake the following activities to improve energy use efficiency:
- develop an EEO project and communication plan;
 - evaluate energy use for the Project;
 - identify and investigate potential EEO; and
 - implement, track, communicate and report on EEO.
- 5.11.2 Hy-Tec will continue to improve on-site diesel use efficiency based on the range of measures outlined in **Section 4.11.8.1**
- 5.11.3 Hy-Tec will explore the use of lower GHG emission energy sources as soon as practical based on the range of measures outlined in **Section 4.11.8.2**.

5.12 Hazards

- 5.12.1 Hy-Tec will store all dangerous goods in accordance with dangerous goods storage requirements and relevant Australian Standards.
- 5.12.2 Hy-Tec will continue to implement the appropriate measures to reduce the risk of fire ignition and the spread of bushfire across the site in consultation with the Rural Fire Services (RFS).

5.13 Rehabilitation and Closure

- 5.13.1 The revised EMP will detail the approach to rehabilitation of the Project, including the species to be used in revegetation works.
- 5.13.2 Wherever possible, rehabilitation will be completed progressively as part of the ongoing development of the quarry.
- 5.13.3 A detailed Quarry Closure Plan will be developed approximately three years prior to cessation of quarrying activities.

APPENDIX 6 NOISE COMPLIANCE ASSESSMENT

Applicable Meteorological Conditions

1. The noise criteria in Table 2 of Schedule 3 are to apply under all meteorological conditions except wind speeds greater than 3 m/s at 10 m above ground level.

Determination of Meteorological Conditions

2. Except for wind speed at microphone height, the data to be used for determining meteorological conditions shall be that recorded by the meteorological station on or in the vicinity of the site.

Compliance Monitoring

3. Unless directed otherwise by the Secretary, annual attended monitoring is to be used to evaluate compliance with the relevant conditions of consent.

Note: The Secretary may direct that the frequency of attended monitoring increase or decrease at any time during the life of the development.

4. Unless otherwise agreed with the Secretary, this monitoring is to be carried out in accordance with the relevant requirements for reviewing performance set out in the *NSW Industrial Noise Policy* (as amended from time to time), in particular the requirements relating to:
 - (a) monitoring locations for the collection of representative noise data;
 - (b) meteorological conditions during which collection of noise data is not appropriate;
 - (c) equipment used to collect noise data, and conformity with Australian Standards relevant to such equipment; and
 - (d) modifications to noise data collected including for the exclusion of extraneous noise and/or penalties for modifying factors apart from adjustments for duration.

Licence Variation

Licence - 12007

AUS - 10 RHYOLITE PTY LIMITED
ABN 79 002 325 144 ACN 002 325 144
PO BOX 6770
SILVERWATER NSW 1811

Attention: David Cilento

Notice Number 1533429
File Number EF13/4048
Date 18-Dec-2015

NOTICE OF VARIATION OF LICENCE NO. 12007

BACKGROUND

- A. AUS - 10 RHYOLITE PTY LIMITED ("the licensee") is the holder of Environment Protection Licence No. 12007 ("the licence") issued under the *Protection of the Environment Operations Act 1997* ("the Act"). The licence authorises the carrying out of activities at 6102 Putty Road, MELLONG, NSW, 2756 ("the premises").
- B. On 10 April 2015 the NSW Department of Planning and Environment issued development consent SSD 4978 for expansion of the Tinda Creek Quarry.
- C. Under section 89K of the *Environmental Planning and Assessment Act 1979* an environment protection licence issued by the EPA must be substantially consistent with the development consent.
- D. This Notice amends the licence to maintain consistency with the conditions in development consent SSD 4978.

VARIATION OF LICENCE NO. 12007

1. By this notice the EPA varies licence No. 12007. The attached licence document contains all variations that are made to the licence by this notice.
2. The following variations have been made to the licence:
 - Condition A2.1 - Address changed from 6102 Singleton Road, Colo Heights to 6102 Putty Road, Mellong
 - Condition A3.2 - Addition of requirement to abide by Development Application and Environmental Impact Statement.
 - Condition P1 - Addition of monitoring point for noise emissions.
 - Condition L3 - Addition of noise limits.

Licence Variation

- Condition L4 - Addition of limits to hours of operation.
- Condition O3.2 - Addition of requirement for trucks to cover loads.
- Condition M2 - Addition of surface water system monitoring requirements.
- Condition M5 - Addition of noise monitoring requirements.
- Condition R4.1 - Addition of noise monitoring reporting requirements.
- Condition R4.2 - Addition of surface water system reporting requirements.

.....
David Gathercole
Acting Manager
Metropolitan - Sydney Industry
(by Delegation)

INFORMATION ABOUT THIS NOTICE

- This notice is issued under section 58(5) of the Act.
- Details provided in this notice, along with an updated version of the licence, will be available on the EPA's Public Register (<http://www.epa.nsw.gov.au/prpoeo/index.htm>) in accordance with section 308 of the Act.

Appeals against this decision

- You can appeal to the Land and Environment Court against this decision. The deadline for lodging the appeal is 21 days after you were given notice of this decision.

When this notice begins to operate

- The variations to the licence specified in this notice begin to operate immediately from the date of this notice, unless another date is specified in this notice.
- If an appeal is made against this decision to vary the licence and the Land and Environment Court directs that the decision is stayed the decision does not operate until the stay ceases to have effect or the Land and Environment Court confirms the decision or the appeal is withdrawn (whichever occurs first).

Environment Protection Licence

Licence - 12007

Information about this licence

Dictionary

A definition of terms used in the licence can be found in the dictionary at the end of this licence.

Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act);
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Variation of licence conditions

The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review

The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

Fees and annual return to be sent to the EPA

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

Environment Protection Licence

Licence - 12007

The EPA publication “A Guide to Licensing” contains information about how to calculate your licence fees. The licence requires that an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints), be submitted to the EPA. The Annual Return must be submitted within 60 days after the end of each reporting period. See condition R1 regarding the Annual Return reporting requirements.

Usually the licence fee period is the same as the reporting period.

Transfer of licence

The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

This licence is issued to:

| |
|--------------------------------------|
| AUS - 10 RHYOLITE PTY LIMITED |
| PO BOX 6770 |
| SILVERWATER NSW 1811 |

subject to the conditions which follow.

Environment Protection Licence

Licence - 12007

1 Administrative Conditions

A1 What the licence authorises and regulates

A1.1 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

| Scheduled Activity | Fee Based Activity | Scale |
|-----------------------|---------------------------------|--------------------------------|
| Extractive Activities | Water-based extractive activity | > 100000 - 500000 m3 extracted |

Note: *The activity scale above refers to the amount extracted per annum.*

A2 Premises or plant to which this licence applies

A2.1 The licence applies to the following premises:

| Premises Details |
|------------------|
| TINDA CREEK |
| 6102 PUTTY ROAD |
| MELLONG |
| NSW 2756 |
| LOT 2 DP 628806 |

A3 Information supplied to the EPA

A3.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:

- a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
- b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

A3.2 Works and activities must be carried out in accordance with the proposal contained in:

- a) development application SSD 4978 submitted to the NSW Department of Planning and Environment on 21 October 2011; and
- b) the Environmental Impact Statement - Proposed Expansion of Tinda Creek Sand Quarry, July 2014 relating to development application SSD 4978 above.

Environment Protection Licence

Licence - 12007

2 Discharges to Air and Water and Applications to Land

P1 Location of monitoring/discharge points and areas

P1.1 The following points referred to in the table below are identified in this licence for the purposes of monitoring and/or setting of limits for the emission of noise from the point.

Noise

| EPA identification no. | Type of monitoring point | Location description |
|------------------------|--------------------------|--|
| 1 | Noise monitoring | The boundary of "Receiver 1" as detailed in Figure 6.1 of the document titled "Tinda Creek Sand Quarry Noise Management Plan Final October 2015", submitted to the EPA on 18 November 2015 |

3 Limit Conditions

L1 Pollution of waters

L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.

L2 Waste

L2.1 The licensee must not cause, permit or allow any waste generated outside the premises to be received at the premises for storage, treatment, processing, reprocessing or disposal or any waste generated at the premises to be disposed of at the premises, except as expressly permitted by the licence.

L2.2 This condition only applies to the storage, treatment, processing, reprocessing or disposal of waste at the premises if those activities require an environment protection licence.

L3 Noise limits

L3.1 Noise generated at the premises that is measured at each noise monitoring point established under this licence must not exceed the noise levels specified in Column 4 of the table below for that point during the corresponding time periods specified in Column 1 when measured using the corresponding measurement parameters listed in Column 2.

POINT 1

Environment Protection Licence

Licence - 12007

| Time period | Measurement parameter | Measurement frequency | Noise level dB(A) |
|-------------|-----------------------|-----------------------|-------------------|
| All hours | LAeq (15 minute) | - | 35 |
| Night | Lmax OR LA1,1min | - | 45 |

L3.2 For the purposes of the table under Condition L3.1 "Night" has the same meaning as in the NSW Industrial Noise Policy (EPA, 2000).

L4 Hours of operation

L4.1 Unless permitted by another condition of this licence, activities at the premises must:

- a) only be undertaken between 7:00 am and 6:00 pm Monday to Friday;
- b) only be undertaken between 7:00 am and 3:00 pm Saturday; and
- c) not be undertaken on Sundays or public holidays.

L4.2 In addition to the limitations imposed by Condition L4.1, construction activities must not be undertaken:

- a) between 7:00 am and 8:00 am Saturdays; and
- b) between 1:00 pm and 3:00 pm Saturdays.

L4.3 In addition to the hours of operation specified in Condition L4.1, dispatch activities may be undertaken:

- a) between 5:00 am and 10:00 pm Monday to Friday; and
- b) between 6:00 am and 3:00 pm Saturdays.

L4.4 Maintenance activities may be undertaken at any time if those activities are inaudible at all residential premises.

4 Operating Conditions

O1 Activities must be carried out in a competent manner

O1.1 Licensed activities must be carried out in a competent manner.

This includes:

- a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and
- b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

O2 Maintenance of plant and equipment

O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:

- a) must be maintained in a proper and efficient condition; and
- b) must be operated in a proper and efficient manner.

Environment Protection Licence

Licence - 12007

O3 Dust

- O3.1 The premises must be maintained in a condition which minimises or prevents the emission of dust from the premises.
- O3.2 The licensee must ensure that all laden vehicles exiting the site have their loads covered.

5 Monitoring and Recording Conditions

M1 Monitoring records

- M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.
- M1.2 All records required to be kept by this licence must be:
 - a) in a legible form, or in a form that can readily be reduced to a legible form;
 - b) kept for at least 4 years after the monitoring or event to which they relate took place; and
 - c) produced in a legible form to any authorised officer of the EPA who asks to see them.
- M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:
 - a) the date(s) on which the sample was taken;
 - b) the time(s) at which the sample was collected;
 - c) the point at which the sample was taken; and
 - d) the name of the person who collected the sample.

M2 Environmental monitoring

- M2.1 a) The licensee must undertake monthly inspections of the surface water system at the premises.
 - b) The monthly inspections must:
 - (i) be undertaken immediately upstream and downstream of the quarry disturbance area;
 - (ii) include visual inspection of litter, oil and grease and sediment levels within the surface water system, including diversion channels;
 - (iii) include visual inspection of the physical integrity of the surface water system, including any signs of erosion; and
 - (iv) include visual inspection of the water level/ flow in Tinda Creek.

M3 Recording of pollution complaints

- M3.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.

Environment Protection Licence

Licence - 12007

M3.2 The record must include details of the following:

- a) the date and time of the complaint;
- b) the method by which the complaint was made;
- c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
- d) the nature of the complaint;
- e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
- f) if no action was taken by the licensee, the reasons why no action was taken.

M3.3 The record of a complaint must be kept for at least 4 years after the complaint was made.

M3.4 The record must be produced to any authorised officer of the EPA who asks to see them.

M4 Telephone complaints line

M4.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

M4.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

M4.3 The preceding two conditions do not apply until 3 months after: the date of the issue of this licence.

M5 Noise monitoring

M5.1 To assess compliance with the noise limits specified within this licence, the licensee must undertake operator attended noise monitoring at each specified noise monitoring point in accordance with the table below.

POINT 1

| Assessment period | Minimum frequency in a reporting period | Minimum duration within assessment period | Minimum number of assessment period |
|-----------------------|---|---|-------------------------------------|
| All hours when in use | Yearly | 1 hour | 1 operation day |

M5.2 The licensee must undertake noise monitoring as directed by an authorised officer of the EPA.

M5.3 All noise monitoring required by this licence must be undertaken in accordance with Australian Standard AS 2659.1 - 1998: Guide to the use of sound measuring equipment - Portable sound level meters, or any revisions of that standard that may be made by Standards Australia, and the compliance monitoring guidance provided in the NSW Industrial Noise Policy.

Environment Protection Licence

Licence - 12007

6 Reporting Conditions

R1 Annual return documents

- R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:
- a) a Statement of Compliance; and
 - b) a Monitoring and Complaints Summary.
- At the end of each reporting period, the EPA will provide to the licensee a copy of the form that must be completed and returned to the EPA.
- R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.
- R1.3 Where this licence is transferred from the licensee to a new licensee:
- a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
 - b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.
- R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on:
- a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
 - b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.
- R1.5 The Annual Return for the reporting period must be supplied to the EPA by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').
- R1.6 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.
- R1.7 Within the Annual Return, the Statement of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:
- a) the licence holder; or
 - b) by a person approved in writing by the EPA to sign on behalf of the licence holder.

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

R2 Notification of environmental harm

- R2.1 Notifications must be made by telephoning the Environment Line service on 131 555.

Environment Protection Licence

Licence - 12007

R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred.

Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

R3 Written report

- R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
- a) where this licence applies to premises, an event has occurred at the premises; or
 - b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence,
- and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.
- R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.
- R3.3 The request may require a report which includes any or all of the following information:
- a) the cause, time and duration of the event;
 - b) the type, volume and concentration of every pollutant discharged as a result of the event;
 - c) the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event;
 - d) the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
 - e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
 - f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event; and
 - g) any other relevant matters.
- R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

R4 Other reporting conditions

Noise monitoring results

- R4.1 a) The licensee must submit the results of any noise monitoring undertaken in accordance with the requirements of Condition M5.1 or Condition M5.2 to the EPA within three weeks of the noise monitoring being undertaken.
- b) The noise monitoring results submitted to the EPA must include:

Environment Protection Licence

Licence - 12007

- (i) a map of each noise monitoring location in relation to the noise source, including relevant distances;
- (ii) an analysis of the noise monitoring results;
- (iii) any detected exceedance of the noise limits specified in Condition L4.1;
- (iv) details of any remedial action taken or proposed to be taken in relation to any exceedance of the noise limits specified in Condition L4.1;
- (v) details of the prevailing meteorological conditions during the period when the noise monitoring was undertaken; and
- (vi) confirmation that noise monitoring was/was not undertaken in accordance with Condition M5.3.

Surface Water System reporting

- R4.2 a) The licensee must submit a report to the EPA detailing the results of the surface water system inspection required under Condition M2.1.
- b) The report must:
- (i) include written details and photographic records of the results of the visual inspections required under Condition M2.1 b);
 - (ii) include details of any actions undertaken or proposed to be undertaken by the licensee in response to the findings of the visual inspections, including no action;
 - (iii) be submitted to the EPA within three weeks of the inspection being undertaken; and
 - (iv) be submitted to:

Manager Sydney Industry
NSW Environment Protection Authority
PO Box 668
Parramatta NSW 2124

7 General Conditions

G1 Copy of licence kept at the premises or plant

- G1.1 A copy of this licence must be kept at the premises to which the licence applies.
- G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.
- G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

Environment Protection Licence

Licence - 12007

Dictionary

General Dictionary

| | |
|--|--|
| 3DGM [in relation to a concentration limit] | Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples |
| Act | Means the Protection of the Environment Operations Act 1997 |
| activity | Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997 |
| actual load | Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009 |
| AM | Together with a number, means an ambient air monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> . |
| AMG | Australian Map Grid |
| anniversary date | The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act. |
| annual return | Is defined in R1.1 |
| Approved Methods Publication | Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009 |
| assessable pollutants | Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009 |
| BOD | Means biochemical oxygen demand |
| CEM | Together with a number, means a continuous emission monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> . |
| COD | Means chemical oxygen demand |
| composite sample | Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume. |
| cond. | Means conductivity |
| environment | Has the same meaning as in the Protection of the Environment Operations Act 1997 |
| environment protection legislation | Has the same meaning as in the Protection of the Environment Administration Act 1991 |
| EPA | Means Environment Protection Authority of New South Wales. |
| fee-based activity classification | Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 2009. |
| general solid waste (non-putrescible) | Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997 |

Environment Protection Licence

Licence - 12007

| | |
|--|--|
| flow weighted composite sample | Means a sample whose composites are sized in proportion to the flow at each composites time of collection. |
| general solid waste (putrescible) | Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997 |
| grab sample | Means a single sample taken at a point at a single time |
| hazardous waste | Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997 |
| licensee | Means the licence holder described at the front of this licence |
| load calculation protocol | Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009 |
| local authority | Has the same meaning as in the Protection of the Environment Operations Act 1997 |
| material harm | Has the same meaning as in section 147 Protection of the Environment Operations Act 1997 |
| MBAS | Means methylene blue active substances |
| Minister | Means the Minister administering the Protection of the Environment Operations Act 1997 |
| mobile plant | Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997 |
| motor vehicle | Has the same meaning as in the Protection of the Environment Operations Act 1997 |
| O&G | Means oil and grease |
| percentile [in relation to a concentration limit of a sample] | Means that percentage [eg.50%] of the number of samples taken that must meet the concentration limit specified in the licence for that pollutant over a specified period of time. In this licence, the specified period of time is the Reporting Period unless otherwise stated in this licence. |
| plant | Includes all plant within the meaning of the Protection of the Environment Operations Act 1997 as well as motor vehicles. |
| pollution of waters [or water pollution] | Has the same meaning as in the Protection of the Environment Operations Act 1997 |
| premises | Means the premises described in condition A2.1 |
| public authority | Has the same meaning as in the Protection of the Environment Operations Act 1997 |
| regional office | Means the relevant EPA office referred to in the Contacting the EPA document accompanying this licence |
| reporting period | For the purposes of this licence, the reporting period means the period of 12 months after the issue of the licence, and each subsequent period of 12 months. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act. |
| restricted solid waste | Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997 |
| scheduled activity | Means an activity listed in Schedule 1 of the Protection of the Environment Operations Act 1997 |
| special waste | Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997 |
| TM | Together with a number, means a test method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> . |

Environment Protection Licence

Licence - 12007

| | |
|-------------------------|---|
| TSP | Means total suspended particles |
| TSS | Means total suspended solids |
| Type 1 substance | Means the elements antimony, arsenic, cadmium, lead or mercury or any compound containing one or more of those elements |
| Type 2 substance | Means the elements beryllium, chromium, cobalt, manganese, nickel, selenium, tin or vanadium or any compound containing one or more of those elements |
| utilisation area | Means any area shown as a utilisation area on a map submitted with the application for this licence |
| waste | Has the same meaning as in the Protection of the Environment Operations Act 1997 |
| waste type | Means liquid, restricted solid waste, general solid waste (putrescible), general solid waste (non - putrescible), special waste or hazardous waste |

Mr Ross Carter

Environment Protection Authority

(By Delegation)

Date of this edition: 11-May-2005

End Notes

- 1 Licence varied by notice 1048725, issued on 14-Jun-2005, which came into effect on 09-Jul-2005.
- 2 Licence varied by notice 1068195, issued on 05-Jul-2007, which came into effect on 05-Jul-2007.
- 3 Licence varied by notice 1075699, issued on 16-Jul-2007, which came into effect on 16-Jul-2007.
- 4 Licence varied by repair to Annual Return Archive, issued on 18-Jul-2007, which came into effect on 18-Jul-2007.
- 5 Condition A1.3 Not applicable varied by notice issued on <issue date> which came into effect on <effective date>
- 6 Licence transferred through application 146114, approved on 26-Jul-2010, which came into effect on 26-Jul-2010.
- 7 Licence varied by notice 1122474, issued on 07-Dec-2010, which came into effect on 07-Dec-2010.
- 8 Licence varied by notice 1530546 issued on 12-May-2015

APPENDIX 3

Groundwater Quality Monitoring Results
